

PROGRAM-LEVEL - STUDENT LEARNING OUTCOMES

**Health Information Technology (HIT) Program
Division of Arts, Sciences and Professional Studies**

Program Director: Deborah Shelvay

Date / Timeframe: Fall 2017 – Spring 2021

PLAN
EXPECTED PROGRAM LEARNING OUTCOME
All students completing this program are expected to have achieved the following learning objectives:
OBJECTIVE 1: At the end of the program, the student will <i>apply policies, standards, accreditation and regulatory requirements to the collection, organization, processing, management and protection of health information.</i>
OBJECTIVE 2: At the end of the program, the student will <i>analyze clinical databases to identify trends that demonstrate quality, safety, and effectiveness healthcare.</i>
OBJECTIVE 3: At the end of the program, the student will <i>interpret the legal and regulatory requirements of healthcare delivery systems, patient privacy, confidentiality and security of health data.</i>
OBJECTIVE 4: At the end of the program, the student will <i>demonstrate the use of technology applications in all aspects of health information.</i>
OBJECTIVE 5: At the end of the program, the student will <i>demonstrate leadership skills in the management of organizational resources.</i>
OBJECTIVE 6: At the end of the program, the student will <i>apply the policies, guidelines and regulatory requirements of data, clinical documentation, classifications/terminologies and reimbursement methodologies to health information.</i>
OBJECTIVE 7: At the end of the program, the student will <i>evaluate and develop policies and procedures for health information services.</i>
OBJECTIVE 8: At the end of the program, the student will <i>employ and promote ethical standards of practice, as defined in the AHIMA Code of Ethics.</i>
