Disclaimer

Please be advised that due to printing deadlines, information in this manual may not be up-to-date. It is the responsibility of each student to ascertain current information regarding the nursing programs as well as the specific nursing level in which the student is enrolled. Current information may be obtained by contacting the student’s advisor, the Program Director or the office of the Dean of Nursing. In preparing this manual, efforts are made to provide accurate and current information; Trocaire College assumes no responsibility for manual errors or omissions. Additionally, students are required to read and sign the attestation at the beginning of each academic year.
August 2019

Dear Nursing Students,

Welcome to Trocaire College and the nursing programs! We are delighted that you have chosen to start the next chapter of your life and professional career with us.

Nurses are an integral component of the health care team who work with other healthcare members to meet their patients’ needs while improving patient outcomes. Our programs emphasize nursing expertise beyond clinical care, such as patient education, health promotion, community health, healthcare across the lifespan, and technology integration. Nurses have opportunities to provide patient care in hospitals, clinics, schools, homeless shelters, and many other agencies, which is why the profession provides so many rich opportunities for the nursing graduate.

Our nursing programs provide students with the opportunity to learn from and be mentored by faculty, and clinical instructors, who are deeply engaged in the nursing profession and are dedicated to helping students achieve academic success.

Students will be taught to use critical reasoning and clinical judgment skills that are required of all nurses. You will base your practice on evidence from research and best practice standards of nursing. Additionally, you will demonstrate unwavering compassion and respect for human life. Some nurses see this as a calling to the profession of nursing. The Catherine McAuley School of Nursing programs empower students to answer that calling and find careers where they make a difference every single day.

The nursing programs at Trocaire College are fully accredited by the Accreditation Commission for Education in Nursing (ACEN).

Please keep this manual to use as a reference throughout your nursing education. It is a supplement to the Trocaire College Catalog and College Student Handbook. All information contained in this manual is subject to change. Changes will be communicated by email or thorough a Moodle announcement as they occur.

On behalf of the faculty and staff of the Nursing Department I/we look forward to working with you and wish you much success.

Warm regards,

Dr. Linda J. Kerwin, CST, RN, Ed.D
Interim Dean of the Catherine McAuley School of Nursing

</table>
As a nursing student, it is important to be aware that there are different levels of preparation that you may choose in order to achieve your goal to become a nurse. The differences in types of nurses involve both professional responsibilities and education. Professional responsibilities vary with the level and depth of education and are determined, to some extent, by the area and facility in which you are employed. Educational programs and the approximate times for completion based on a full time study in a selected program include:

1. Licensed Practical or Vocational Nurse (LPN, LVN). 9-12 months.
2. Associate Degree Nurse (RN) 2 years
3. Baccalaureate Degree Nurse (RN, BSN) 4 years
4. Master’s of Science of Nursing (MSN) 2 more years after completion of BSN
5. Doctorate of Nursing (Ph. D or DNS) 2 or more years after completion of MSN
6. Doctorate of Nursing Practice (DNP) 2 or more years after completion of MSN

Each of the above programs is a separate course of study. However, some schools have a ladder-type program that allows students to receive some credit for education at another level, in encouragement of the pursuit of a higher degree.

Trocaire College offers three nursing programs:

1. Certificate of Practical Nursing – a two semester full-time day program that prepares the student to sit for the NCLEX PN upon graduation. This program also a part-time option.
2. Associate of Applied Science in Nursing – There are both part-time and full-time options as well as Day and Evening options. The full-time option is a four semester program that prepares the student to sit for the NCLEX RN exam upon graduation.
3. Baccalaureate in Nursing degree completion program – this option provides students whom have successfully passed the NCLEX RN to complete a BS degree in 15 months of full time study. This program also a part-time option.

Please keep in mind that the completion of a formal pre-licensure program does not end one’s education but marks the beginning of one’s professional learning. Nurses, at all levels, have an obligation to be life-long learners to ensure quality, evidence-based care is provided to all patients.

NURSING PROGRAM MISSION STATEMENT

The mission of Trocaire College Nursing Programs are to be responsive to current and evolving health care needs by providing quality nursing education that is in keeping with currently accepted social, educational and nursing standards and is consistent with the mission of the college.
The Trocaire Nursing Faculty accepts the philosophy of Trocaire College and its mission and functions within its framework.

The Nursing Faculty believes that health is a dynamic and individualized state of biopsychosocial and spiritual well-being affected by environment, access to health care, lifestyle choices, education, and culture. Health is an individually perceived state of well-being that is positively valued, affects all aspects of life, and determines one's quality of life.

The holistic understanding of health gives rise to a view of nursing as a caring profession. The professional nurse recognizes that all human beings are unique individuals who have the ability to adapt to the environment. The professional nurse believes that human beings are entitled to be treated with respect and dignity and that cultural heritage and spiritual beliefs influence health behaviors. Health care is a partnership in which the patients share responsibility for achieving optimal health.

Today's professional nurse assumes multiple roles as provider of care, manager of care, and member within the discipline of nursing in meeting the needs of individuals and families. The professional nurse provides this care for people from all stages of life and all degrees of need along the health-illness continuum. A background in nursing theory and knowledge from other sciences and general education is necessary for the provision of health care.

Education is a life-long process involving the acquisition of knowledge and the development of critical thinking skills. Learning occurs in various settings and should be self-directed, flexible, and learner-focused. The faculty view nursing education as dynamic and ongoing resulting in a change in knowledge, attitude, and behavior of students. Faculty believes nursing education requires that students develop a scientific and psychosocial theory base, communication skills, and the ability to apply the nursing process.

The nursing faculty accepts its responsibility to provide an environment for a diverse student population that supports learning through a variety of teaching/learning methods, a curriculum that builds on previous knowledge and experience, and a learning sequence that moves from simple to complex concepts. We encourage students to assess their own goals and to assume responsibility for learning.

The faculty provides our graduates with the educational preparation to apply the nursing process in making critical decisions in their role as health care providers. We prepare graduates to function successfully within the scope of their academic preparation and to make a commitment to the value of caring and to their own professional growth.

Preparation for a career involves not only the development of cognitive (knowledge) and psychomotor (technical) skills, but also professional attitudes and behavior (affective performance). The nursing faculty at Trocaire College expects all students to demonstrate a professional attitude and professional behavior at all times. Additional information on professionalism, including specific information for students completing off-site capstone, clinical or practicum experiences, is available in later sections of the Guide and/or in the course syllabus.
PROFESSIONALISM OBJECTIVES

In addition to learning how to solve problems and perform experiments, part of the education of a professional involves the development of professional behaviors. We hope that the behaviors you will learn during your educational journey at Trocaire College will serve as the foundation of your professional demeanor during your career as a health care professional. To assist you in developing professional attributes, each course in the department will include a rating of your professional characteristics.

1. Exhibit the ethical and professional behaviors required within the healthcare delivery system
2. Communicate with instructors and peers in a constructive, professional manner (polite, considerate, pleasant, and unhurried).
3. Work cooperatively with other students, including sharing equipment and supplies.
4. Accept constructive criticism and modify behavior accordingly.
5. Exhibit behaviors consistent with the professional and ethical standards of the discipline
6. Display professional, courteous and cooperative behaviors

THE ROLE OF THE NURSE IN HEALTH CARE

According the ANA - Nursing is:

*the protection, promotion, and optimization of health and abilities, prevention of illness and injury, facilitation of healing, alleviation of suffering through the diagnosis and treatment of human response, and advocacy in the care of individuals, families, groups, communities, and populations (the American Nurses Association, 2016)*

STUDENT LEARNING OUTCOMES FRAMEWORK

Program Learning Outcome’s incorporate the nursing program’s philosophy, National League for Nursing (NLN) competencies and core values, The Quality and Safety Education for Nurses (QSEN) pre-licensure competencies, and Standards of Practice. Additionally, each program will add program level competencies such as:

- The Practical Nursing Program utilizes the *Educational Competencies by The National Association for Practical Nurse Education and Service* (NAPNES) to develop the student learner outcomes (SLO).
  - [https://napnes.org/drupal-7.4/sites/default/files/pdf/standards/standards_read_only.pdf](https://napnes.org/drupal-7.4/sites/default/files/pdf/standards/standards_read_only.pdf)

- The AAS Nursing program focus on the *National League for Nursing* (NLN) competencies

- The BS in Nursing utilized the *Essentials of Baccalaureate Education for Professional Nursing Practice*
  - [http://www.aacn.nche.edu/education-resources/BaccEssentials08.pdf](http://www.aacn.nche.edu/education-resources/BaccEssentials08.pdf)
## PLAN

### EXPECTED PROGRAM LEARNING OUTCOME

All students completing this program are expected to have achieved the following learning objectives:

<table>
<thead>
<tr>
<th>OBJECTIVE 1: Communication</th>
<th>At the end of the program, the student will effectively communicate with diverse client populations and disciplines using a variety of strategies and respecting client's cultural beliefs and practices.</th>
</tr>
</thead>
<tbody>
<tr>
<td>OBJECTIVE 2: Collaboration</td>
<td>At the end of the program, the student will collaborate with clients, families, health team members to assist clients in achieving optimal wellness.</td>
</tr>
<tr>
<td>OBJECTIVE 3: Critical Thinking</td>
<td>At the end of the program, the student will make sound judgments that synthesize nursing science and knowledge from other disciplines in the provision of safe, quality nursing care.</td>
</tr>
<tr>
<td>OBJECTIVE 4: Safety</td>
<td>At the end of the program, the student will apply national safety standards in the context of patient self-determination and recognize that both individuals and systems are responsible for patient safety.</td>
</tr>
<tr>
<td>OBJECTIVE 5: Informatics</td>
<td>At the end of the program, the student will apply technology and information management tools to support safe processes of care.</td>
</tr>
<tr>
<td>OBJECTIVE 6: Professional Standards</td>
<td>At the end of the program, the student will integrate a personal philosophy of professional nursing practice incorporating legal, moral and ethical standards.</td>
</tr>
<tr>
<td>OBJECTIVE 7: Professional Responsibility</td>
<td>At the end of the program, the student will assume responsibility and accountability for one’s own education and nursing practice.</td>
</tr>
<tr>
<td>OBJECTIVE 8: Safety/Technology</td>
<td>At the end of the program, the student will provide a safe environment using technology and information systems in nursing practice.</td>
</tr>
<tr>
<td>OBJECTIVE 9: Advocacy</td>
<td>At the end of the program, the student will advocate for health policies that address local and global health issues through participation in nursing organizations.</td>
</tr>
</tbody>
</table>
BS, Nursing Program

<table>
<thead>
<tr>
<th>OBJECTIVE 1: Communication</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the program, the student will communicate and collaborate in a timely manner with members of the interdisciplinary health care team to promote and maintain the optimal health status of patients, families, populations, and communities.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJECTIVE 2: Collaboration</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the program, the student will communicate and collaborate in a timely manner with members of the interdisciplinary health care team to promote and maintain the optimal health status of patients, families, populations and communities.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJECTIVE 3: Critical Thinking</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the program, the student will use clinical reasoning and knowledge based on the baccalaureate degree nursing program of study, evidence-based practice outcomes, and research studies as the basis for decision-making and comprehensive patient care.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJECTIVE 4: Safety</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the program, the student will provide safe, compassionate, comprehensive nursing care to patients, families, populations and communities through a broad array of health care services.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJECTIVE 5: Informatics</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the program, the student will appropriately apply emerging patient care technologies and utilize sophisticated information management systems in the healthcare setting.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJECTIVE 6: Professional Standards</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the program, the student will analyze and implement appropriate nursing practices in accordance with the complex interrelated requirements of the healthcare policy, finance and regulator environments.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJECTIVE 7: Professional Responsibility</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the program, the student will demonstrate knowledge of the New York State Nursing Practice Act and the New York State Office of Professions Nursing Rules that emphasize safety, as well as all federal, state, and local government and accreditation organization safety requirements and standards.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJECTIVE 8: Safety/Technology</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the program, the student will communicate and manage information using technology to support decision-making to improve patient care and delivery systems.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Objective 9: Advocacy</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the program, the student will serve as a health care advocate in monitoring and promoting quality and access to health care for patients, families, populations, and communities.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Objective 10: Leadership/Management</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the program, the student will demonstrate skills in leadership, quality assessment and improvement, and patient safety.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Objective 11: Research</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the program, the student will maintain a spirit of inquiry and use research findings to provide evidence-based nursing care.</td>

STUDENT SUCCESS

Study Skills and Time Management

One of the most important keys to success in college is the understanding of the time commitment required outside of the classroom. Per the federal credit hour regulations, for every one credit hour in which you are enrolled, you will spend two hours outside of class studying.

- 3 credit hours (1 course) = 3 hours in class per week = 6-9 hours study time per week.
- 12 credit hours (4 courses) = 12 hours in class per week = 24-36 hours study time per week.

- Federal Credit Hour Regulation: 2 hours of study per 1 hour of class; if going full time (12 hours) that equals 24 hours of studying per week AND don't forget about your job and family! That could easily add up to more than 40 hours a week!

- Faculty
  In College, your teachers are known as called "Professors"; Professors rarely teach to the text or will the professor lecture nonstop. Students are required to think beyond the course material. Please do not call faculty and staff by their first or last name only. This is unprofessional and in the clinical setting may be deemed as unacceptable behavior.

Exams

The National Council Licensure Examination (NCLEX-RN® exam) has one purpose: To determine if it's safe for you to begin practice as an entry-level nurse. It is significantly different from any test that you took in nursing school. While nursing school exams will follow NCLEX style questions. These type of questions are not knowledge based exams but application and analysis using the nursing knowledge. Students will be expected to use critical thinking skills to make nursing judgments.

 Mercy Action Project (MAP)

Service learning improves student learning outcomes and contributes to student personal and social development (see Critical Thinking Dimensions below). Faculty report enhanced teaching, service, and research opportunities and academic institutions report increased student retention and improved “town/gown” relationships. Community partners receive additional resources to support their agencies’ mission. Unless otherwise noted, the following outcomes are documented in these studies. It is a college requirement that MAP be completed prior to graduation.

Clinical Rotations

The nursing programs provide clinical learning opportunities for students. This is the time where students can link theory to real life patient care. Students will attend a variety of health care settings, including obstetrics, medical-surgical care, pediatrics, community health, sub-acute care, long-term care, and psychiatric nursing.

Clinical rotations can vary in times, dates, and locations due to course objectives, clinical site availability, etc. Clinical hours range from 8 to 12 hours depending on the course and clinical objectives. Clinical sites include healthcare facilities in the Buffalo Metro area as well as the
surrounding suburbs. Students are responsible for their own reliable transportation as well as any cost incurred due to parking at facilities. Clinical sites are assigned to meet student needs and requesting a specific clinical instructor or clinical site is not permitted under any circumstances.

ACADEMIC AFFAIRS STUDENT POLICIES

Classroom Policies and Procedures

A. Refer to college course catalog as well as individual course syllabi.

Trocaire College Services

DISABILITY SERVICES

Trocaire College is committed to ensuring that students with disabilities have equal access to their coursework through reasonable academic accommodations or modifications. Reasonable accommodations are determined on a case-by-case basis. Any student who feels s/he may need an accommodation based on the impact of a disability should contact The Office of Disability Services. Students are expected to identify themselves as a student with a disability and will be asked to provide current documentation from a licensed provider.

To find out more information or discuss eligibility for accommodations, please contact the Director of Wellness in Room 118 of our Choate Campus or at 827-2412.

TUTORING

Students will be referred to academic support services by full time level faculty. The referral will be based on the following criteria:

- Students identified at risk
  - Grades below 73 on unit exams
  - Students with a documented disability

Any student not meeting the above criteria can receive assistance from the peer/instructor tutors in the Palisano Center for Academic Success.

FERPA & HIPAA POLICIES

The Family Educational Rights and Privacy Act (FERPA)

Just as there are laws governing patient privacy (HIPAA), similar laws exist to protect student privacy. Student records are confidential and protected under the Family Educational Right and Privacy Act (FERPA). As a general rule, faculty and preceptors should approach student privacy much in the same manner that clinicians approach patient privacy. Conversations about student progress and achievement are appropriate among the educational team but should otherwise be treated as confidential. Student papers and faculty documentation and evaluation of student progress (i.e., grades) are treated as confidential. School of Nursing resources can be contacted for any questions about student privacy issues.
HIPAA Policy
All nursing students will need to view the HIPAA Tutorial. There is a link on the Trocaire Library's webpage. When the HIPAA training is completed, students should print the certificate and submit the certificate to the appropriate instructor. The Certificate will be kept in the student clinical folder.
Click on the link provided below.
https://nciph.sph.unc.edu/tws/login/

Hospital Incidents/Injuries Policy
Students must report incidents to the instructors or appropriate hospital personnel immediately. When an incident occurs at a clinical site, e.g. student injury or patient-related mishap, after initial actions are complete, appropriate Hospital and College forms must be completed. A student who sustains personal injury must report to Student Health Office for completion of necessary paperwork.

Requirements for All Nursing Programs

College credit is granted based on classroom, clinical, college laboratory, simulation experiences and clinical seminars. Students are responsible for attending all classes, clinical experiences, college laboratories, simulation experiences and clinical seminars. Please refer to the program progression policy for additional information.

General Information

The Trocaire College Student Policy Handbook contains the resources for understanding the academic and administrative policies that are important for academic success. It includes a wide range of information for important federal policies, including rights to privacy, grading policies, and policies and procedures concerning refunds, withdrawals and other administrative issues.
The nursing program’s curriculum moves from simple to complex. Each nursing course builds on the knowledge of the previous level courses. Courses in each level of the curriculum must be completed before advancing to the next level. Any variations must be approved by the Dean of Nursing.

THE CATHERINE MCAULEY SCHOOL OF NURSING
ACADEMIC POLICIES

- All students will be bound by the policies described in the most recent edition of the Catherine McAuley School of Nursing Policy and Procedure Manuel, in addition to those described in the College Student Handbook.

- Nursing are bound by these additional policies that are described in this manual.

- All students engaged in school-related activities at off-campus locations are bound by the policies, agreements, or other stipulations set forth by the partner site.

- The school of nursing and the college reserve the right to implement additional policies or to modify any of the policies stated herein if warranted, and will notify students, in writing by way of Trocaire College email and/or the Trocaire College Moodle site.

- Time limit/expiration on any of my general education courses. As long as your liberal arts and science courses transfer to Trocaire College courses will not expire. However, nursing courses will expire after five years.
  - Length of time since credit was earned – Is an important consideration because the information you learned when you first took the nursing course may no longer be current or valid. The nursing program’s goal is to ensure graduates entering the workforce have current knowledge and an accurate understanding of the relevant information, theories, and practices in their field.
NOTICE TO STUDENTS REGARDING CRIMINAL BACKGROUND CHECKS

Current laws generally permit a state licensing board or agency to deny a license to practice nursing if the applicant has been convicted of a felony or other specified crime. Like many state licensing boards, the Office of the Professions of the New York State Education Department requires that a criminal background check be conducted prior to granting a license to practice nursing. Questions should be directed to the NYS Office of Professions: at http://www.op.nysed.gov

The Nursing Programs at Trocaire College do not require a criminal background check, but the educational requirements include placement at one or more hospitals or other off campus clinical training sites, and these sites frequently require a student to undergo a criminal background check before the student can be placed for clinical learning experience. If, based upon the results of a criminal background check, the site determines that a student's participation in its clinical training program would not be in the best interest of the site, the site may deny that student admission to the training program. Even if the student has already begun the placement when the results are received, the site may elect to dismiss the student, regardless of the student's performance while in the training program.

Each clinical training site that requires a criminal background check sets its own standards and procedures, and you may be asked by the site to pay the cost of the background check. Please note that if a clinical training site determines that you may not take part in its training program based on the results of a criminal background check, you may be unable to complete your course requirements and to continue in the Nursing program. It is important for you to consider this before you enroll in the Nursing program. Trocaire College has no obligation to refund your tuition or fees or to otherwise accommodate you in the event you are ineligible to complete your course requirements based on the results of a criminal background check, or if you are denied a license to practice nursing.

CLASSROOM POLICIES

Attendance

Due to the nature of the clinical and educational requirements of the Nursing Programs, punctual attendance is required at all class sessions and clinical experiences. When a student accepts his/her placement in one of the Nursing Programs, he/she is accepting the responsibility of attending class, laboratories and clinical assignments.

Late arrivals and early dismissals in lecture/lab/clinical/simulation may lead to a course failure.

If the college is closed due to adverse weather conditions, the student shall not attend any off-campus clinical placement site. In other words, if the college is closed due to inclement weather, then nursing students should not be driving or otherwise traveling to off-campus sites.
Absence Policy

- **Excused absence** with the following requirements
  - When serious illnesses and unexpected serious life events occur, students must submit appropriate documentation:
    - doctors note for illness (a minimum of one-hour notice to instructor before class, lab, and or clinical)
    - note from funeral home for death of immediate family (at least 24 hour notice)
    - Supporting documentation of the accident to be submitted as soon as available.
    - court documents (at least 24 hour notice)
    - Military service – as soon as you receive orders and no later than 24-hours.

1. If the student is scheduled for a clinical assignment, the student must follow the protocol as described above for reporting off duty at the clinical site. Failure to follow the procedure for reporting off from a clinical experience will result in failed clinical day and document on the student’s clinical performance evaluation. A second failure to follow the procedure for reporting off from a clinical experience will result in a course failure.
2. Following an absence due to illness or injury, the student must present written clearance from the physician to return to school. See the Technical Standards Policy. The programs require that following an absence due to illness or injury, the student must present written clearance from the physician to return to school.
3. Following any absence, it is the responsibility of the student to contact the teacher to discuss the consequences of the absence and the potential options for making up lost work.
4. In the event of lateness for any lab, lecture exam, or clinical a student will be denied admittance to the lab, exam, or clinical exam. Unless the students receive consideration from the instructor for the approved reasons and conditions the student will receive a zero grade on the exam or an unsatisfactory (failed) clinical day.

- **Unexcused Absence**
  Repeated or unexcused absences may be considered reason for either failure of the nursing course or from the nursing programs. Unexcused absences include but are not limited to:
  - Appointments and minor illnesses may not be excused from exams or clinical.
  - Vacations, parties
  - Oversleeping/alarm failure
  - Arriving to lab or clinical after the official start time without an acceptable reasons and approval of instructor
  - Leaving lab or clinical during the regular scheduled hours without an acceptable reasons and approval of instructor
  - Personal grooming appointments (hair, nails, tanning, etc.)
  - Employment/job interview
  - Shopping/errands
  - Family vacations
  - Needed at home/babysitting
  - Car trouble
  - Missing the bus/ride
  - Needing sleep or rest
  - Etc.
Late Arrival
- The faculty believes that punctuality is a desirable, professional nursing behavior. Late Arrival for class, lab, or clinical experience is defined as “the student arriving late or leaving early from the assigned experiences.” Students may be sent off the clinical area if they are tardy and they may consequently risk their ability to pass the clinical objectives. Late Arrival will be documented. Students showing patterns of Late Arrival will receive counseling and may result in a course, exam, quiz, lab, or clinical failure.

Class

Students are expected to attend all regularly scheduled classes. Excessive absenteeism may result in a failing grade (see course syllabus policy regarding specific course policies).

Make-Up Procedure for Missed Class, Examination, Clinical

1. All absences from clinical experiences will be documented on the student’s individual clinical evaluation form.
2. The student is responsible for making up the lost work. Students are responsible for all class content presented. Make-up assignments and corresponding grades are at the sole discretion of the course faculty member.
3. Missed examination

Students are expected to attend an examination on the day and time that it is scheduled. Students who miss an examination due to an excused absence will be given an alternate exam. Students that are late for exams will not be permitted to have extra time. It is the responsibility of the student to contact the teacher within 24 hours of return to school to arrange a time for a make-up of the missed examination. All examinations must be made up within one week (5 school days) after return to school. Examinations not make up within this time period will be assigned a 0%. Missed examinations due to unexcused absences will be assigned a grade of 0%.

College Laboratory

Students are to attend all college lab experiences. For any absence, students must notify the Lab instructor prior to the missed lab. The student is responsible for contacting the lab instructor to make up the missed lab (and possibly prior to next clinical). As stated above students absent from more than two scheduled experiences: clinical, college labs or clinical seminars will constitute a course failure.

- College Laboratory Testing
  Students are required to attend College Lab Testing. Any absence from the assigned laboratory testing without instructor notification and without a documented excuse may result in a clinical failure. Students who are unsuccessful in college lab testing must demonstrate mastery of lab skill(s) within two weeks of lab testing. Mastery of skills is a course requirement. See course syllabi for specific course information.

- Simulation Experience
  Students are required to attend all simulation experiences. Attendance will be monitored by the simulation faculty. As noted above students absent from more than two scheduled experiences: clinical, college labs or clinical seminars will constitute a course failure.
COMMUNICATION

Professional communication is the expectation of all nursing students. The importance of effective, timely communication is essential. Communication between students, faculty and other members of the college community are an essential component to academic success.

Each student has been given a Trocaire College email address. Trocaire College official means of communication is the college email system. Students must use their student email address for college business. It is expected that students will check their Trocaire College email account and Moodle every day to look for important announcements and information. Students are responsible for information sent to their college email address and/or posted on their courses’ Moodle sites.

METHODS OF INSTRUCTION USED THROUGHOUT THE PROGRAMS

Instruction methods are varied throughout the programs. Nursing faculty will use a variety of methods in order to deliver content, engage student learning, and teach students to think like a nurse. Some of the methods of instruction include:

- Self-Directed Study
- Computerized Technology
- Demonstration
- Multimedia
- Written Course Requirements
- Clinical Laboratory
- Pre-Conference
- Experience
- Post-Conference
- College Laboratory
- Lecture
- Clinical Seminar
- Case Studies
- Simulation
- Interactive technology

New York State Education Department Regulations state

Compliance with Federal Credit Hour Definition
Institutions of higher education must demonstrate how courses offered for credit comply with the federal definition of a credit hour. In general, for every 1 credit hour assigned to a course, students should be provided with the equivalent of 1 credit hour (50 minutes) of instruction and two hours (100 minutes) of out of class assignments, for 15 weeks. Actual assignment of credit hours will depend on the nature of the course (lecture, lab, clinical, seminar, etc.).

Academic

- Classroom Course Requirements
  Course Syllabi contains information regarding expectations for each course which includes but not limited to:
    - Grade distribution
    - Assignments
Clinical Objectives
Faculty contact information

It is the students’ responsibility to use their syllabus as a course guide.

**Exam Policy**

It is the policy of the nursing programs that a nursing faculty member (or responsible designee) is present in the classroom or skills lab at all times during the administration of a test, quiz, examination, skills testing or other form of graded assignment.

Course Examinations may be administered in NU courses in pencil-and-paper or web-based format. Specific

Instructions and policies regarding course examinations are included in individual course syllabi. No student will be permitted to repeat any course examination once taken.

HESI competency exams will be administered per policy with the assigned course. See the course syllabus for further details.

For the Fall 2019 semester, fourth semester students will have a Dosage Calculation Competency Test. Students must achieve a grade of 90% with no more than three (3) attempts by the end of the third week of the semester. Starting Spring 2020 all levels will have the Dosage Calculation Competency Test with each core nursing course each semester.

**Examination Review**

Following course examinations, faculty will provide opportunities for student review of the examination. Details regarding opportunities for individual and/or group review sessions and student expectations regarding examination review will be provided in individual course syllabi. Student actions during all examination review sessions are expected to be consistent with academic integrity and professionalism. Students acting in a manner inconsistent with academic integrity expectations during an examination review session will be subject to a grade of Zero for the examination being reviewed and potential dismissal from the course and/or program. Student actions inconsistent with the professional nursing role will result in cessation of the review session. Students have two weeks after an exam to review an NU course examination.

**Examinations in the Learning Center**

Students who are eligible, as determined by the Director of Wellness, to take examinations in the Learning Center must comply with Learning Center policies and deadlines as well as course policies and deadlines (stated in individual course syllabi) when arranging for any examination. Examinations taken in the Learning Center must be scheduled on the same day and as close as possible to the time scheduled for the rest of the class. Students who do not comply with Learning Center and course policies and deadlines may be unable to take the examination in the Learning Center.

**During the Exam**

During examinations or any form of testing only authorized material may be on the desk or in the skills lab. In other words, desktops should be clear except for the materials needed and authorized for testing. All
other materials and belongings must be placed on the floor at the front of the room or in an appropriate holding area designated by the instructor. Please do not remove shoes during the exams.

Any student who violates this exam policy will be referred to the Dean of Nursing, and will receive a zero on the exam. Failure to follow exam policies and expected classroom behavior will be deemed as a breach of exam integrity and or an act of academic misconduct.

The materials and belongings that are not permitted include, but are not limited to, the following:
- Caps or hats of any kind. Note: If there is a medical or religious reason that a student must wear something on his/her head, then permission to do so must be secured at the start of the semester and in advance of any test or graded assessment.
- Electronic devices of any kind, including cell phones, watches, Google Glass, iPads, etc.
- Purses of any kind
- Book bags of any kind
- Water bottles, food
- Phones must be turned off (not on mute) and in backpacks. They may not be kept on your person.
- Students must make every effort to attend class section they are registered for.
- Student MUST take the course tests in the class section they are registered in regardless of attendance to other sections for lecture.
- Student must take all tests and the final.
- Missed tests/final without notification and/or valid documentation will result in a zero for the exam.
- If a student is unable to take an examination at the scheduled time due to a confirmable emergency (illness, death, etc.) the student must notify professor in writing prior to the start of the exam and arrangements will be made for making-up the exam. The student is expected to provide appropriate written documentation related to the absence. Documented illness a student must provide a note from a physician; if a student must attend a funeral they must provide a note from the funeral home, etc. Failure to adhere to the above policies will result in a zero grade on examination.
- Make up exams must be scheduled with the professor within one week of the missed exam. Any extenuating circumstances must be approved by the course instructor.
  - Testing time: All exams and quizzes must be taken in the lecture section in which the student is registered. Exams are given in a variety of formats your instructor will provide any required information at the time of the exam.
  - Exams follow NCLEX timing patterns; this is to prepare you for the NCLEX exam. You may have as few as 75 or as many as 265 questions on the exam and a maximum of six hours to complete the exam (with 2 - 10 minute breaks). If your test is the maximum of 265 questions you are given 1.2 minutes per question to take the exam (this takes into the account that there are 2 – 10 minute breaks).
    - Example: 60 minutes for 50 questions (this gives you time to read instructions and start the exam).
  - Pace yourself accordingly, there is no extra time granted for any reason.
  - If you are late for an exam you will not be provided extra time. It is the students’ responsibility to manage their time, and to anticipate traffic and/or weather related issues.
- Answer Sheets: Computer answer sheet must be completed in the allotted time period. Once answer sheets are submitted to the proctor, no additions or deletions can be made. Grade is based on answers submitted on the computer sheet. It is the students’ responsibility to fill in the scantron correctly, any calculations and/or alternative format answers are completed in accordance with exam instructions. Grades are based on the answers placed by the student on the computer answers sheet.
Exam Reviews: Students may review exams and exam grades within two weeks after exam grades are finalized unless other arrangements are made with an individual instructor. At the end of the semester, the final exam may be reviewed with course faculty at a designated date and time. Student will not be permitted to review all exams either the week before or after the final.

Any student determined by faculty to have cheated on an exam will receive a zero grade for the exam, and may fail the course. In addition, the situation will be referred to the Dean for further action.

Final course letter grades will be posted after all sections have completed exams.

Classroom Etiquette:

Electronic Recording

Audio recording of classroom lectures is permitted only with written permission of the lecturer. Audio recording devices must be in the front of the classroom and visible to the lecturer. Recorded audio files are for the personal use of the student; public posting of such files by the student is a violation of copyright law. No other type of electronic recording (audio, video, still photography) is permitted in the classroom. Use of personal electronic devices for any type of recording in the clinical setting is strictly prohibited.

Policy on Graded Assignments

Each faculty member will specify on his/her syllabus any grading policies including re-grading of tests, quizzes, papers, lab reports, or any other form of graded assignment for that particular course.

All assignments are intended to facilitate students’ integration of knowledge. It is mandatory that all theory and clinical assignments be completed in order to pass the course.

An assignment is considered late after the announced due date unless otherwise arranged with the course faculty. Late assignments will receive a deduction of points per day times the number of work days late. Each course syllabus will identify the number of points per day will be deducted per assignment. After 5 work days, the assignment will receive a “0” unless a student has written permission from an instructor to turn in late assignments.

Failure to submit written clinical assignments prior to the next clinical experience will result in the student not being permitted to participate in the clinical experience until the written assignments are up to date. This equates to a clinical failure for the day.

</table>

A student must achieve a 2.00 QUALITY POINTS or better to progress to the next level. Students must achieve a grade of “C” or better in all program required courses.

Final Course Grade

Rounding of the grade will only occur on the final course grade. Rounding rules will be applied. A grade ending in 0.5 or higher will round to the next whole number, a grade ending in 0.49 or lower will round to the next lowest whole number.

Dosage and Alternative Questions

The dosage questions assesses competency in calculating dosage and administering medication safely. It is an important requirement that demonstrates that the student is prepared for the responsibility of administering medications to clients in the clinical setting. Dosage review sheets will be available to students and students during orientation to some courses. Students wishing to review the material may seek guidance from nursing faculty during course orientation.

Students are encouraged to show all work in class and on exams. Calculators will be provided. Calculators may not be shared.
Alternate Item Formats Questions: According to the National Council of State Boards of Nursing (NCSBN)

An alternate item format is an exam item, or question, that uses a format other than standard, four-option, multiple-choice items to assess candidate ability. Alternate item formats may include:

- Multiple-response items that require a candidate to select two or more responses
- Fill-in-the-blank items that require a candidate to type in number(s) in a calculation item
- Hot spot items that ask a candidate to identify one or more area(s) on a picture or graphic
- Chart/exhibit format where candidates will be presented with a problem and will need to read the information in the chart/exhibit to answer the problem
- Ordered Response items that require a candidate to rank order or move options to provide the correct answer
- Graphic Options that present the candidate with graphics instead of text for the answer options and they will be required to select the appropriate graphic answer

Any item formats, including standard multiple-choice items, may include multimedia, charts, tables or graphic images. It is the students’ responsibility to follow the instructions for exams and how answers are calculated, illustrated, etc.

Incomplete Grades

A. Refer to College Catalog

Clinical Experiences

Clinical nursing practice is a foundation of nursing education. The nursing programs are diligent in obtaining clinical experiences at a variety of facilities, sites, and/or units that will best enable students to meet the course and program objectives. Due to intense competition among local nursing programs for placements, the availability of clinical sites varies by semester. It is probable that, as a student progresses through the nursing programs, the student will encounter clinical coursework that will take place on a weekend and/or evening time frame and will take place in the Buffalo metropolitan and surrounding area. Students planning their course schedules will be notified at the start of the semester about clinical schedules, and can plan their other responsibilities accordingly. The nursing department will not accept requests for clinical sites or times for clinical.
Clinical Information

Clinical nursing courses are designed to provide the number of clinical hours necessary to meet the required clinical competencies, which are an essential element of the course objectives; for this reason, participating in all clinical experiences is mandatory. Students are required to be on time and to attend all clinical experiences and sessions.

Professional behavior and accountability is expected. Failure to complete all required clinical experiences will result in failure of the clinical course.

Students are required to attend all scheduled clinical experiences.
  o If absent, the student is required to notify the appropriate instructor and/or facility as directed prior to the start of the scheduled experience. Students must provide documentation from a physician if ill.
  o Students who are absent for a scheduled experience must fulfill objectives as specified by the appropriate instructor before the final exam.
  o Students absent for 2 or more than two scheduled experiences: clinical, college labs or clinical seminars will constitute a course failure. A Petition for Reconsideration must be submitted to the instructor if students miss more than two clinical days with proof of an absence for each missed clinical day. **Note:** A third clinical absence is only granted to student who missed clinical/class/lab due to document illness (note from a health care provider on the day of each of the absences, a death of a first generation relative proof required). Students will not be granted a third clinical day due to non-compliance of clinical objectives.
    ▪ Students in NU 124, NU 217, and NU 220 will not be permitted to miss more than two clinical days. These classes have 24 hours of clinical per class and missing more than two clinical days’ fails to meet the course and clinical objectives. Additionally, there are limited clinical days and times for these rotations and the programs are unable to provide any additional clinical make-up.

Clinical Experience make-up procedure

Good clinical experience sites and clinical teacher coverage are precious resources. Individual contracts with affiliation sites may or may not provide for additional clinical time to be used as “make-up” clinical experiences. Students must understand that missing scheduled clinical experiences may jeopardize their ability to pass the course.
   a) Follow the procedure in the course outline for reporting off from a clinical assignment.
   b) Contact the clinical instructor/clinical coordinator on the day of return from the absence to discuss a makeup experience.
   c) Clinical and laboratory make-up will be at the discretion of the instructor.
      ▪ A remediation form will be written to delineate the specific learning objectives that must be accomplished to pass the course. A remediation form becomes a permanent part of the student’s record.
      ▪ All assigned makeup hours must be completed to pass the course.

  o If the Petition for a third clinical day is approved by the instructor, clinical make up experiences will be scheduled at the student’s expense.
  o Any student who must make up a clinical absence or have a repeated experience due to a failed clinical day must make up each of the clinical day.
    ▪ If a student is absent from an 8 hour clinical they must make up 8 hours of clinical.
If a student is absent from a 12 hour clinical they must make up 12 hours of clinical.

Clinical Rotations
The nursing programs provide clinical learning opportunities for students. This is the time where students can link theory to real life patient care. Students will attend a variety of health care settings, including obstetrics, medical-surgical care, pediatrics, community health, and psychiatric nursing.

Clinical rotations can vary in times, dates, and locations due to course objectives, clinical site availability, etc. Clinical hours range from 8 to 12 hours depending on the course and clinical objectives.

Clinical Requirements
- Clinical rotations are a minimum of 8 hours. Some courses have weekly clinical days and other courses students will attend clinical every other week. Please see your course registration and course syllabi.
- First semester student’s will be assigned to the nursing skills lab weeks 1-4 (not clinical). Then starting week 5 - first semester students will start clinical’s in their assigned setting. All clinical policies are in effect for all nursing labs and simulation labs (see clinical requirements.
- NU 222: 12 hours a week for 14 weeks = minimum of 180 clinical hours.
  - Due to clinical space limitations students may be placed in clinical rotations as follows:
  - One (1) 12 hour clinical rotation or,
  - Two (2) 8-hour clinical rotations per week
- Clinical Hours: As stated above students must meet the minimum clinical hour requirement of New York State Office of Professional requirements. The nursing programs will make every effort to place students in clinical within their enrolled program: day students in day clinical and evening students into evening clinical however, we cannot guarantee days/hours for clinical placements.
  - The programs place nearly 700 students in clinical each semester and are unable to accept requests for clinical sites/instructors or times.

Clinical Course Requirements and Policies
- Transportation to and from clinical is the responsibility of the individual student.
- Students doing rotations at the Veterans Administration Hospital are required to have a Criminal Background Checks (The VA covers this cost). Students may need to go to a center to have the background check completed.

Student Health Requirements:
- Students enrolling for the fall semester must provide all required health records to the Wellness Center by May 30th.
  - Students enrolling after these dates will have one-week to turn in all required documents.
- Students enrolling for the spring semester must provide all required health records to the wellness office by October 30th.
  - Students enrolling after these dates will have one-week to turn in all required documents.
- Students may not attend clinical until health records are in compliance.
Students are required to submit and maintain compliance with the following:

Clinical Evaluation Tool Guidelines

The clinical evaluation tool is used for all clinical nursing courses. Each nursing course builds on prior knowledge, skills, and attitudes (follows QSEN - Quality and Safety Education for Nurses). [http://qsen.org/competencies/pre-licensure-ksas/](http://qsen.org/competencies/pre-licensure-ksas/) obtained throughout the programs.

Clinical Documentation

Clinical documentation is expected for every clinical course. It is different for each clinical setting and includes but is not limited to the review and acceptance of partnering hospital’s rules and guidelines. This documentation will include items such as patient confidentiality, HIPAA and other patient safety computer modules and student nurse orientations which are specific to each hospital. Even if the student is employed by the hospital where their clinical rotation occurs, the student will need to submit the required documents.

Successful completion of a clinical component of nursing courses will require satisfactory achievement in course evaluation methods as described in the course syllabus. This requirement may include but is not limited to:

- satisfactory completion of all course objectives
- satisfactory clinical performance (defined below)
Clinical Performance

Students are expected to demonstrate consistent professional behavior and consistent application of nursing theory in the clinical arena. Clinical performance in each course will be assessed using the clinical evaluation tool, and students must achieve satisfactory ratings and earn a “pass” in all categories in order to demonstrate satisfactory clinical performance. Failure to perform at the satisfactory level on any portion of the clinical evaluation will result in the student earning a clinical failure, and the student will receive a grade of “F” for the entire course regardless of the performance in the theory portion of the course. Two unsuccessful clinical days will result in a clinical failure and course failure. Any student failing clinical will not be permitted to withdraw from the course. Students are expected to follow all clinical guidelines and professional expectations that are provided for each course.

Competencies

Students may be required by their clinical placement site to complete site-specific competencies and training (e.g., patient safety, social media policies, hazardous materials training, etc.). Completions of these competencies/trainings are the student’s responsibility. Students are required to submit proof of completion of mandatory competencies/training, per partnering facility requirements, prior to starting their clinical experience. Students who do not submit all of the necessary paperwork by the posted deadline will not be permitted to participate in the clinical course(s), and will be dropped from the roster. Clinical instructors or the nursing department clinical coordinator will let students know of required competencies.

The need for a clinical “repeat” necessitates that the same hospital documentation will need to be completed again. Nursing students are expected to communicate in a timely and professional manner and to submit any documents pertaining to courses, and clinical experiences, in a timely manner as indicated in emails sent by faculty and staff.

Communication in the manner which is considered to be professional, that is timely, courteous and informative may is also expected. It is imperative that Trocaire College e-mail be checked often!

Clinical Preparation

All Nursing students are required to spend time preparing, for each clinical day. There are post clinical requirements as well. For example, care plans and other written work are often required prior to entering the clinical area. Students must budget their time accordingly, and should plan to spend time in addition to course hours in order to be properly prepared for the clinical experience.

Clinical Attendance

Clinical nursing courses are designed to provide the number of clinical hours necessary to meet the required clinical competencies, which are an essential element of the course objectives; for this reason, participating in all clinical experiences is mandatory. Students are required to be on time and to attend all clinical experiences and sessions. Professional behavior and accountability is expected. Absences must be preapproved by the Clinical Instructor no less than one hour before the clinical assignment is scheduled to begin.

As stated above
Students are required to attend all scheduled clinical experiences.
If absent, the student is required to notify the appropriate instructor and/or facility as directed prior to the start of the scheduled experience. Students must provide documentation from a physician if ill or funeral home for the death of a first level relative (spouse, child, parent, grandparent only).

- Other absences are not excused and will result in a failed clinical day. Students will be required to make up any failed/unexcused/excused absences.

- Students who are absent for a scheduled experience must fulfill objectives as specified by the appropriate instructor before the final exam.

- Students absent for two scheduled experiences in non-specialty courses: clinical, college labs or clinical seminars will constitute a course failure. A Petition for Reconsideration must be submitted to the instructor if students miss more than two clinical days with proof of an absence for each missed clinical day. **Note: A third clinical absence is only granted** to student who missed clinical/class/lab due to document illness (note from a health care provider on the day of each of the absences, a death of a first generation relative – proof required). Students will not be granted a third clinical day due to non-compliance of clinical objectives.

  - **Students in NU 124, NU 217, and NU 220 will not be permitted to miss more than one clinical day.** These classes have 24 hours of clinical per class and missing more than one clinical day fails to meet the course and clinical objectives. Additionally, there are limited clinical days and times for these rotations and the programs are unable to provide any additional clinical make-up.

- If the Petition for a third clinical day is approved by the instructor, clinical make up experiences will be scheduled at the student’s expense.

- Any student who must make up a clinical absence or have a repeated experience due to a failed clinical day must make up each of the clinical day.

  - If a student is absent from an 8 hour clinical they must make up 8 hours of clinical.
  - If a student is absent from a 12 hour clinical they must make up 12 hours of clinical.

**Clinical Experience make-up procedure**

Good clinical experience sites and clinical teacher coverage are precious resources. Individual contracts with affiliation sites may or may not provide for additional clinical time to be used as “make-up” clinical experiences. Students must understand that missing scheduled clinical experiences may jeopardize their ability to pass the course.

- d) Follow the procedure in the course outline for reporting off from a clinical assignment.
- e) Contact the clinical teacher/clinical coordinator on the day of return from the absence to discuss a makeup experience.
- f) Clinical and laboratory make-up will be at the discretion of the teacher.
  - A remediation form will be written to delineate the specific learning objectives that must be accomplished to pass the course. A remediation form becomes a permanent part of the student’s record.
  - All assigned makeup hours must be completed to pass the course.

- o If the Petition for a third clinical day is approved by the instructor, clinical make up experiences will be scheduled at the student’s expense.
- o Any student who must make up a clinical absence or have a repeated experience due to a failed clinical day must make up each of the clinical day.
  - If a student is absent from an 8 hour clinical they must make up 8 hours of clinical.
If a student is absent from a 12 hour clinical they must make up 12 hours of clinical.

**Failure to complete all required clinical experiences will result in failure of the clinical course.**

When health issues are involved in clinical absence, both student and client safety will be considered. Specifically,

- Students must disclose to the nursing clinical instructor and the clinical coordinator any health related issue that may put either the student or a patient in danger. These issues include, but are not limited to, surgery, injury, and other major health related concerns. For the safety of the student and the fetus, pregnancy should be disclosed as soon as possible. Please see the nursing Functional Skills Requirements found on the Trocaire.edu website at [https://trocaire.edu/app/uploads/2016/05/Functional-Abilities-Technical-Standards-for-Nursing-Program.pdf](https://trocaire.edu/app/uploads/2016/05/Functional-Abilities-Technical-Standards-for-Nursing-Program.pdf)

- Students are required to provide evidence from their health care provider that they may fully participate in all classroom, laboratory, and clinical activities without restrictions, and that a student's health concerns will not adversely affect patients. This evidence must be submitted to and approved by the clinical coordinator before returning to the classroom, or clinical activities.

- Students may be counseled to withdraw from nursing courses in order to allow time for them to receive treatment and to improve their health condition, and to maintain the safety of patients.

- In the event of inclement weather, students should follow the College’s decision. In other words, if the college is closed due to inclement weather conditions, then students should not attend clinical.

**Clinical Evaluation Tool Guidelines**

The clinical evaluation tool is used for all clinical nursing courses. Each nursing course builds on prior knowledge, skills, and attitudes. *Content based upon QSEN Competencies and KSA’s.

All clinical learning experiences will be evaluated upon completion and/or as deemed necessary by the faculty. Students who are not meeting clinical outcomes will be counseled individually as needed.

The Clinical Performance Evaluation Tool has 2 sections for Clinical Supervisors to complete. The Daily Clinical Evaluation (page 2) to be completed after each clinical day and the Midterm and Final clinical evaluation beginning on page 4 which defines the behaviors being evaluated for each Core Competency.

Students will review this performance evaluation tool: 1) before each clinical experience, 2) at midterm, 3) following the final clinical experience, and 4) as otherwise deemed appropriate by the Clinical Supervisor or Course Faculty.

- An unsatisfactory “U” for any clinical learning experience at final evaluation constitutes failure of the course.

- **Core Competency Statements**
Each core competency has associated statements, which specify individual guidelines. The core competency statements are based upon level of matriculation in each clinical course. Each clinical course has a unique clinical evaluation tool specific to the course and level.

**Grading Guidelines**

Clinical Performance will be evaluated with a Clinical Performance Tool, and will be scored either “S” “NI” or “U”.
Every student must receive a score of “S” on the Clinical Performance Tool during the final clinical evaluation to pass the course. *Two unsuccessful clinical days will result in a clinical failure and course failure.*
- Any student failing clinical will not be permitted to withdraw from the course.
- If a student receives a “U” on the Clinical Performance Tool during the final clinical evaluation, the student will FAIL the course.

**Grade Descriptions**

A grade of “S” means the student:
- Functions satisfactorily with minimum guidance in the clinical situation.
- Demonstrates accurate and appropriate knowledge and integrates knowledge with skills and attitudes.
- Engages consistently in self direction in approach to learning.
- Provides evidence of preparation for all clinical learning experiences.
- Follows directions and performs safely.
- Identifies own learning needs and seeks appropriate assistance.
- Demonstrates continued improvement during the semester.
- Uses nursing process and applies scientific rationale.

A grade of “NI” means the student:
- Functions safely with moderate amount of guidance in the clinical situation.
- Demonstrates adequate knowledge and requires moderate assistance in integrating knowledge with skills.
- Requires some direction in recognizing and utilizing learning opportunities.
  - Students receiving an NI: a remediation from will be initiated and specific actions will be identified which may include a referral to the college lab to practice skills. Students will have one week to complete the remediation that was identified.

A grade of “U” means the student:
- Requires intense guidance for the performance of activities at a safe level.
- Clinical performance reflects difficulty in the provision of nursing care.
- Demonstrates gaps in necessary knowledge and requires frequent or almost constant assistance in integrating knowledge and skills.
- Requires frequent and detailed instructions regarding learning opportunities and is often unable to utilize them.
- Is often unprepared and has limited insight into own behavior.
- Is unable to identify own learning needs and neglects to seek appropriate assistance.
- Not dependable, lateness, unexcused absence
- Breaches in professional or ethical conduct such as falsification of records and failure to maintain confidentiality.
- Students receiving a U: Depending on the nature of the event either a remediation from will be initiated and specific actions will be identified. Students will have one week to
complete the remediation that was identified. Or students may be removed from the clinical site and this will result in a second clinical failure.

- Two unsuccessful clinical days will result in a clinical failure and course failure.
- Any student failing clinical will not be permitted to withdraw from the course.

The Clinical Evaluation is a comprehensive record of the student's clinical performance for one semester. A final evaluation appointment must be made prior to the nursing final exam (see course manual).

- Unsatisfactory Clinical Performance - Students will be informed of unsatisfactory performance by the instructor verbally and in written form by means of the Anecdotal Record, the Remediation form, and/or the clinical Evaluation Form (see Appendices in course Syllabus).

- Unsatisfactory evaluation – will be based on the following criteria.
  - The student:
    1. Fails to satisfactorily complete clinical course requirements within the specified time frame. Including but not limited to immunizations and flu requirements.
    2. Fails to demonstrate improvement to a satisfactory level in identified areas of clinical performance commensurate with guidance given.
    3. Violates any of the following areas:
      a. Patient Safety – Violation of National Patient Safety Goals
         1. Endangers the safety of the patient.
         2. Fails to perform clinical competencies appropriately
         3. Indicates lack of required preparation.
         4. Requires constant guidance and supervision.
      b. Asepsis – violation of Asepsis/Standard Precautions
      c. Professional behavior: Student fails to
         2. Make appropriate notification of absenteeism or tardiness for clinical day.
         3. Submit required written assignments within specified time frame.
         4. Comply with the recommendations of the Remediation Form.
         5. Make or keep appointment for clinical evaluation conference within the specified time frame.

Students who demonstrate unsatisfactory performance will have the opportunity to improve their performance to a satisfactory level through:

- Referrals to College Laboratory for skill improvement
- Collaboration with instructor for guidance in meeting course requirements
- Students who do not demonstrate improvement by the date established by the clinical instructor will receive a failing grade (F) in the course.
  - Two unsuccessful clinical days will result in a clinical failure and course failure.
  - Any student failing clinical will not be permitted to withdraw from the course.

Remediation Form documents the student's unsatisfactory behaviors, which require improvement. It includes a brief statement of the instructor's recommendation(s). Both instructor and student sign the form. The instructor also documents follow-up student responses to recommendations. Students who receive Clinical Remediation Forms will be considered in danger of clinical failure.
College Lab Referral Form is given by the clinical instructor requiring the student to review and practice a skill during an open laboratory session. Students must follow and complete the directives written on the form before the next clinical experience.

Clinical Evaluation Conference

Upon completion of a nursing course with a clinical component, students are required to meet with the instructor, by appointment, within the specified time frame for a clinical evaluation conference. During the conference, records which document the evaluation of student clinical performance are reviewed by the student and the instructor. When students sign the evaluation, it indicates they have read the records. Students have the option to disagree, in writing, with the instructor's evaluation and to explain their theory based rationale.

Guidelines for Professional Appearance and Attire For Nursing Students

The nursing student’s professional appearance and attire influences patient care as well as the public’s image of nursing. Whether the nursing student is providing care for the acutely ill patient in a hospital setting or teaching the family in the home, she or he is being scrutinized by others who are forming mental images about nurses and nursing. The public’s perception of nurses and nursing may influence the effectiveness of nursing practice and should be considered as the nurse provides care. The nursing student is expected to provide an environment that enhances and promotes healing. This is accomplished in a number of ways. The student will maintain a professional appearance and attire that is neat, clean, and appropriate. The student will provide a hygienic, unobtrusive, calm, and comfortable environment that focuses on the needs and a healing of the patient. In keeping with these commitments the school has adopted the following policies:

Policies Regarding Professional Appearance and Presentation

Students are expected to wear the nursing uniform unless an alternate dress code is specified in the course syllabus. Students must maintain a professional appearance at all times in the clinical and nursing lab area. Clinical Instructors or faculty may use individual discretion in dismissing students from the clinical area for inappropriate dress. Dismissal for inappropriate dress will result in missed clinical time, which will adversely affect the student’s ability to meet the course objectives and may result in clinical failure.

Policies Regarding Attire

The nursing student’s professional attire influences the public’s image of nursing in general and the school specifically. Whether the nursing student is providing care for the acutely ill patient in a hospital setting or teaching the family in the home, she or he is being scrutinized by others who are forming mental images about nurses and nursing. The public’s perception of nurses and nursing may influence the effectiveness of nursing practice and should be considered as the nurse provides care. Likewise, the student’s image of nursing is positively influenced when students take pride in their professional appearance, in their school, and in their identification with peers.
Attire in Hospitals/ Nursing Lab (clinical learning activities), and Simulation

Specific expectations of the dress code (some policies are adopted by Trocaire Colleges’ nursing programs from the CDC, WHO, and Joint Commission standards) include:

- **Professional grooming** includes meticulous personal hygiene.
- **Perfumes**, colognes, and body odor should be avoided, the odor of cologne and perfumes can be nauseating and distressing to someone who is ill,
- **Tobacco**: third-hand smoke and odor in a like manner the third-hand smoke and odor on clothing, breath, skin, or hair is an impediment to health, can be offensive, and is not acceptable.
- **Gum and or tobacco chewing** is **not permitted** during the clinical experience
- **Hair**
  - Hair colors other than those that are naturally occurring will **not be allowed**.
  - Hair should be styled away from the face and fastened up off the collar in a manner that does not interfere with asepsis.
  - Head coverings or accessories are limited to black, or white and must be tied back and away from the face.
  - Dreadlocks or braids, if worn, must be clean, well maintained, and, if below the collar, must be secured
  - Beards and mustaches must be short, trimmed neatly, and clean. It must be able to be contained by a surgical mask.
    - **If the student will potentially be using N95 facemasks, face must be clean and shaved.**
- **No false eyelashes** this is an infection control issue.
- **Fingernails**
  - Artificial nails: Studies consistently demonstrate that artificial nails results in higher rates of Gram-negative organisms which increases the transmission of bacteria to patients. The CDC, WHO and the Joint Commission guidelines nurses (and students) shall not wear artificial nails or nail extenders. Artificial nails are not consistent with infection control guidelines and are not permitted any clinical.
  - Nails should not be longer than ¼” to be consistent with the CDC, the WHO, and Joint Commission. Nail polish is not permitted! No ACRYLIC Nails!
- **Jewelry**
  - Earrings must be limited to ONE stud-style earring per ear. Please note that multiple ear rings on the ears or face area are not permitted.
  - Body Piercing: other than earlobes, may not be visible. Only clear retainers may be used to maintain the piercing while the jewelry is out so as to make the piercing less noticeable.
  - Rings: only plain wedding bands are permitted. No rings with stones are permitted due to the potential for the stone to cause injury to the patient, tear through gloves or harbor pathogens.
  - Bracelets are not permitted
  - Wristwatches may be worn; expansion bands are preferred.
  - No facial piercings are permitted.
- **Tattoos**
  - Visible tattoos are not permitted. Clothing, a large Band-Aid, or make up must cover all tattoos at all times in clinical settings.
- **Cell phones** are **strictly prohibited in patient care areas**. Students who are found with phones in a patient care area will be sent home for the day. This equates to a failed clinical day.
  - Students may give the units phone number to individuals who may need to contact them in an emergency during clinical hours
- **Mental Health clinical rotations:**
  - Students who are attending Mental Health clinicals are expected to dress in general business casual dress unless otherwise directed.
  - Students may be required to wear a white lab coat or jacket.
Uniforms are not worn for mental health clinical rotations. Students’ clothing must conform to agency/institutional safety requirements. Name tags must be worn. Therefore, students are reminded to give serious thought to the type of clothing they choose to wear. No bare midriff allowed. Halter type tops, printed t-shirts, leggings etc., excessive jewelry, jeans, and clogs are not considered appropriate apparel.

- **Photo identification badges** are REQUIRED to be worn on the uniform at all times for clinical practice and on the lab coat when students are present in agencies for orientation or assessment prior to clinical practice. The photo identification badges are obtained the first week of school or during orientation from the security guard at the college.

- **Miscellaneous:**
  - Modest and indiscernible undergarments must be worn when on any clinical assignment, whether in uniform or street clothes.
  - Display of cleavage or bare midriff is not professional and prohibited in any clinical area.

- **Hoodie, sweat shirts, and sweaters are not permitted.** Students may wear long sleeve white athletic shirts under their uniform. Logos must not be visible.

- **Valuables,** including purses, are to be left home or locked in the trunk of your car.

- If a class immediately precedes and/or follows a nursing clinical experience, students will be permitted to attend in uniform (covered by a lab coat), white socks and shoes.

- Students who are employed are not to wear job-related uniforms or job related ID badges in the clinical areas.

- **Confidentiality:**
  - The Health Insurance Portability and Accountability Act (HIPAA) require that all protected health information (PHI) be kept private by all persons who have access to that information. Any violations of HIPAA regulations may result in dismissal from the Nursing Programs.
  - **Cameras,** (including cellular phones with a camera), tape recorders, and other recording devices are not to be used in the clinical area for recording identifiable client data or images. Students must follow facility policy.
  - Under no circumstances whatsoever is the student allowed to remove any patient information from the clinical unit including copies of lab values, patient histories etc.

- Noise level on the clinical unit is to be kept to a minimum

- Respect and professional behavior is required at all time

  - Additional dress code expectations may be established by the Clinical Instructor, or Dean of Nursing at any point during the clinical experience, and must be adhered to by the students. At times, partner agencies may allow dress other than the school uniform (scrubs, lab coats.) Please consult the course syllabus for direction.

---

**The Official Trocaire College Nursing Student Uniform**

Student uniforms identify the Trocaire College nursing students as students; the uniform helps limit confusion with other health care providers. **Uniforms are required for students who have registered for clinical nursing courses.** All items of the uniform must be kept clean and wrinkle free.

Uniforms will be purchased through the Trocaire College Bookstore. No other uniform will be accepted. The cost of the uniform is the responsibility of the student.

**The uniform for all Trocaire PN/ADN nursing students consists of:**

- A white scrub top with the program insignia (PN or ADN program specific) and maroon scrub pants.
  - Students for religious reasons may wear long wine colored skirts.

---

36
- White leather nursing shoes or all-white leather athletic shoes. Shoes must have closed toe and heels. No crocs or clogs are permitted. Shoes must be kept clean.
- White sock
- Students who are “cold” or have arm tattoos may wear white long sleeved athletic shirts. There must be NO logo or writing on the shirt. They must remain white during the clinical experience.
- Trocaire College Picture ID is to be attached to right side of the uniform near the neckline.
  - NYS Office of Professions: Practice Information states that you are legally required to wear an identification badge indicating your name and your professional title if you are practicing at a hospital, clinic, group practice or other establishment offering health services to the public.
- Bandage scissors, black ink pen, pen light, stethoscope, calculator, and watch (with second hand) must accompany the uniform.

* Please note: Failure to comply with the required nursing uniform policy will result in a student being sent home from clinical. This will be counted as a failed clinical day.

Unsafe Clinical Practice

It is expected that all students participating in clinical settings are physically and mentally competent, at all times, to provide safe patient care. A faculty member, clinical instructor, or agent of the clinical site may remove from the clinical area any student deemed to be clinically unsafe. This removal will be documented and reported to the Dean of Nursing for follow up. Removal constitutes a clinical absence, which carries consequences (please see clinical attendance policy above).

Transportation

*Students are responsible for their own transportation to all classes and clinical experiences, including parking fees and other travel expenses.*

Cardiopulmonary Resuscitation (CPR)

It is the responsibility of each student to obtain cardiopulmonary resuscitation (CPR) certification and to maintain the certification by renewing it before the expiration date. **Required CPR Program:**

1. American Heart Association - Basic Life Support (2 year certification)
   - a. On-line CPR course is not acceptable

Students must have current CPR certification in order to participate in clinical nursing courses. **Students will not be permitted in any clinical area without proof of current CPR certification;** any student not meeting this requirement will be asked to leave the clinical area. This circumstance constitutes an unexcused clinical absence and will result in the inability of that student to meet course objectives. CPR certification must remain current and be valid for the entire academic year.
Simulation Lab Attendance and Absences

As stated above students absent from more than two scheduled experiences: clinical, college labs or clinical seminars will constitute a course failure.

SAFETY GUIDELINES

Latex Warning

Some of the equipment in the NSL contains Latex. If a student has a known sensitivity/allergy to latex, please inform the skill lab coordinator. Every effort has been made to replace equipment with latex-free substitutions, as available. The veins in the IV arms and pneumothorax bladders contain latex. Users who suffer from latex allergies should take precautions while using or handling the latex parts by wearing non-latex protective gloves

Nursing Skills Lab

The purpose of the nursing skills lab is to provide nursing students with the opportunity to practice hands on skills and critical thinking skills in a simulated hospital setting. The nursing skills lab helps students with remediation, skill building, required lab hours, medication administration, and offers students a variety of nursing resources. The nursing skills lab and simulation lab offers simulated hospital settings that include regular hospital beds with VitalSim mannequins, and SimMan (a computerized mannequin in a separate simulation room), and various medical carts and supplies, all to enhance basic, intermediate, and advanced nursing skills.

- Student MUST follow the programs uniform policy while in labs! Failure to follow the policy constitutes a failed lab experience.
- Professional behavior is expected. Inappropriate behavior will not be tolerated and will be sanctioned.
- The nursing lab has specific hours of availability throughout the academic year that are posted on the doors. All students are responsible for checking the nursing lab hours as they are subject to change. Alternate hours may be available by appointment for clinical referrals.
- It is the student’s responsibility to sign up, call, or email appointment requests to any of the skills lab staff for specific dates and times that he/she would like to works in the skills lab.
- It is expected that students will call or email the NRC faculty if they need to cancel an appointment or be late for an appointment. Failure to do so constitutes a lack of professionalism and the student will be sanctioned.
- Students are expected to come to the skills lab ready to work. All required readings or assigned videos must be completed before attending the NRC for practice.
- Students will be required to participate in all college laboratory activities and demonstrate satisfactory performance appropriate to each level.
- Cell phones must be turned off (no visible “buzz” or lights) while working in the nursing and simulation labs.
- Attendance is required at college laboratories at scheduled times.

Unsatisfactory laboratory performance will be based on the following criteria:

a. Safety – Violation of National Patient Safety Goals (QSEN)
   1. Endangers the safety of the simulated patient.
2. Fails to perform required College laboratory techniques appropriate to level of preparation and meet stated laboratory objectives.
3. Indicates lack of required preparation.

b. Asepsis – Violation of Asepsis/Standard Precautions

c. Professional Behavior
   1. Fails to comply with Code for Professional Behavior for Nursing Students.
   2. Fails to notify College laboratory instructor regarding tardiness or absenteeism on scheduled laboratory day.
   3. Fails to comply with the recommendations of the Remediation Form.

College Laboratory/Clinical Skills Testing

Students will be required to demonstrate satisfactory performance of college laboratory skills. Time and date will be specified on class schedule. Criteria for skills testing will be found in Appendices in the Course Syllabus. **STUDENTS MUST WEAR TROCAIRE COLLEGE UNIFORM FOR TESTING.**

All nursing students must successfully pass College Laboratory Testing. The student will be awarded the allotted points if critical elements are demonstrated during initial testing.

College Laboratory / Simulation (Grading Criteria Pass/ Fail)

Students are to attend all on-campus lab sessions. Students must notify their lab instructor prior to all missed labs unless they are unable due to being incapacitated.

In the event of an excused absence students must provide acceptable documentation that led to missing the scheduled clinical simulation/Lab class within one week of the absence.

Examples of acceptable excuses are and not limited to illness, accidents, emergencies or loss of immediate family members. Circumstances not included in these examples are subject to review by the Director of On-campus Clinical Learning.

Students must adhere to this attendance policy lack thereof constitutes a course failure. Students must arrange a makeup activity/ or assignment as per the direction of their lab instructor for all absences – excused or unexcused.

College Laboratory Testing (Grading Criteria Pass/ Fail)

Students are required to attend College Lab Testing. Students must notify the Director Of on-Campus Clinical Learning/Simulation at 827-2463 and in writing nirellip@trocaire.edu of any absence or tardiness. In the event of an absence students must provide acceptable documentation that led to missing the scheduled Laboratory Testing Day simulation within one week.

Students are required to act in a professional manner at all times, this includes dressed in the appropriate nurse uniform and student Nurse ID for every class, and minimally a stethoscope, unless directed by the lab instructor.

Examples of acceptable excuses are and not limited to illness, accidents, emergencies or loss of immediate family members. Circumstances not included in these examples are subject to review by the Director of On-campus Clinical Learning. Students must adhere to this attendance policy lack thereof constitutes a course failure.
Students who are unsuccessful at demonstrating a lab skill will be offered remediation. As per their Lab course instructor they must practice in open lab and be evaluated by another instructor. If the student remains unsuccessful after the second attempt, the student must make an appointment to meet with the Director of On-campus Clinical Learning for the third skills evaluation. Students must successfully demonstrate All laboratory skills, attendance criteria and profession performance to successfully meet the requirements of this course.

**SIMULATION LABORATORY EXPERIENCE & REQUIREMENTS**

**Simulation Experience**

**Goal & Purpose of Simulation in Nursing**

- Simulation creates a state of the art, hands on learning experience for all nursing students. Simulation provides opportunities for student to learn about the care of patients across the continuum clinical situations.
- Simulation is the opportunity for students to practice newly learned skills in a safe and realistic environment.
- Simulation is designed to promote safe competent nursing care of patients.
- Simulation improves learner proficiency and offers them a more progressive and comprehensive skill set (Laerdal Simulation Users Network (2015) and
- Simulation is designed to improve student confidence and competence (a key indicator in student success), as well as measuring or validating; theoretical knowledge, psychomotor skills, clinical decision making skills, communication, teamwork.
- Simulation experiences provide students with new knowledge in an environment conducive for focusing on critical thinking, clinical reasoning, and clinical judgment skills.
- Simulations and case scenarios imitate the clinical setting and are designed to help the student develop problem-solving and decision-making skills. Simulations enhance the transition from the laboratory to the clinical.

Simulation in nursing education does not replace the need for hands-on experience learned in clinical practice but complements other teaching and learning approaches in preparing novice nurses for their role in practice. Such an environment allows students to participate in a variety of complex case scenarios and practice in a life-like, hands-on situation without the threat to patient safety or ethical concerns.

**General Information**

The Nursing Simulation Lab (NSL) is located in room 312. The NSL simulates a hospital and a home-care setting. The lab is fully equipped to practice all nursing clinical skills.

**Lab Conduct/Behavior**

Professional behavior is expected while in the simulation lab. All users of the lab space must act in a manner that does not disturb the academic activities occurring in the lab. No lab user shall infringe upon the privacy, rights, privileges, health, or safety of other lab users. Conduct within the lab should imitate the conduct expected during the clinical experience.

No eating or drinking in the lab is allowed. Students will be asked to leave the lab if they use the equipment for any purpose other than specified; any student who refuses to participate in the simulation
experience or is disruptive. If a student is asked to leave the lab due to the above reasons, this will constitute as a failed component of the course/programs.

Confidentiality
All simulation practice sessions involving students and/or recordings are considered confidential. All mannequins should be treated as real patients (including inappropriate viewing). Discussion of scenarios or information is considered a violation of the Nursing Programs privacy policy. Students are expected to uphold all requirements of the Health Insurance Portability and Accountability Act (HIPAA) and any other federal or state laws requiring confidentiality. Students are expected to report any violations to the simulation faculty.

Students may be videotaped for evaluation of skill performance and this is for training purposes only. Recordings are for educational purposes and debriefing opportunities with the appropriate faculty, staff and students. Students are required to keep the simulation activities confidential to protect privacy and discourage inappropriate discussion of the video contents or student’s performance in the simulation scenarios. Any viewing or publication outside of the classroom, such as posting on YouTube, is unacceptable and unethical.

Simulation Scenarios
When a student is in the NSL for simulation scenarios, the simulation mannequins are to be used with respect and be treated as if they were live patients. Please do not use newspaper, betadine, and ink pens near the mannequins.

The simulation lab is a learning environment. The students involved in the scenario should have everyone’s respect and attention. Situations simulated in the lab are to be used as a learning tool and no discussion of the action(s) of fellow students should take place outside of the lab. A debriefing session will be provided for all simulation experiences.

Components of Simulation

  Pre-briefing
    ➢ An information session given prior to the start of a simulation activity. Sets the stage for the activity and assists students in achieving scenario objectives.

  Debriefing
    ➢ Encourages participant to explore emotions, question, reflect and provide feedback to each other. Purpose is to move toward assimilation of theory, practice and research in order to influence future actions.

  Reflective Practice
    ➢ Considered an essential component of experiential learning, it promotes the discovery of new knowledge with the intent of applying this knowledge to future situations. Has the potential to decrease the gap between theory and practice

      (INACSL, 2011)

Students must sign up for simulation scenarios as per directed by their lead course instructor.

  Unsatisfactory Simulation Experience performance will be based on the following criteria:

  a. Safety – Violation of National Patient Safety Goals
      1. Endangers the safety of the simulated patient
      2. Fails to address and treat mannequin as a “real” patient
      3. Fails to perform required College laboratory techniques appropriate to level of preparation.
4. Indicates lack of required preparation

b. Asepsis – Violation of Asepsis/Standard Precautions

c. Professional Behavior- Student fails to
   1. Comply with Code for Professional Behavior for Nursing Students
   2. Notify Nursing and Simulation Lab facilitator regarding tardiness or absenteeism on scheduled simulation day
   3. Adhere to HIPAA policy of discussion of the action of fellow student outside of lab.
   4. Participate in simulation activities and/ debriefing

### SOCIAL MEDIA

#### Nursing Student Guidelines for the Use of Social Media

**Purpose**

The purpose of a social media policy is to provide guidelines to students, faculty, and staff who engage in online social networking. Individuals should refrain from sharing information that in any way reflects Trocaire College and the academic environment, including clinical practice, internships, outreach, and other activities related to the nursing programs and or college. Such sharing may violate the Health Insurance Portability and Accountability Act (HIPAA), the Family Educational Rights and Privacy Act (FERPA), and/or the policies stated herein.

As members of the academic and healthcare communities, social media use should reflect honesty, courtesy, and respect for others. Students are expected to display and maintain integrity and professionalism while communicating. Thus, nursing student posts or on-line activities should reflect positively upon the Nursing Programs as well as its student body, faculty, and staff. Any statements, pictures or expressions that could cause harm or injury to an individual or to the school will be considered grounds for dismissal from the programs.

Please remember that social networking sites are in fact public forums. This means that the information that is posted or shared can be viewed by unintended others, even if it has been deleted. It is a well-known fact that employers check these sites when recruiting and hiring employees; violation of privacy norms can have devastating effects on one's career.

To read more about social media policies and issues in nursing the National Council of States Boards of Nursing document: [https://www.ncsbn.org/NCSBN_SocialMedia.pdf](https://www.ncsbn.org/NCSBN_SocialMedia.pdf)

**Definition**

Following HIPPA, FERPA, and NYS Board of Nursing laws students are personally responsible and potentially liable for the material they publish on user-generated social networking sites. Instances of inappropriate use of social and electronic media will be reported to the relevant educational/clinical partner, and may be require reporting to the NYS Board of Nursing, or other applicable professional oversight committee/organization and may result in their issuance of a censure or sanction. Reasons for censure or sanction by the nursing programs, the college and/or the professional body may include the following:

- unprofessional conduct
- unethical conduct
- moral turpitude
- mismanagement of patient record
revealing a privileged communication
revealing proprietary information
breach of confidentiality
defamation
invasion of privacy
harassment
bullying

Expectations

Always Consider Posts Public

- Before posting on Facebook, Twitter, or other social media, please consider the appropriateness of the post as it may appear on the front page of a newspaper or the headline of the evening news.
- Avoid posting anything that is defamatory, offensive or harassing.
- Avoid posting content about peers, administrators, or faculty that is, or could be construed as, derogatory or defamation of character.
- Never post comment either directly or indirectly which reflect patients, diagnoses, or any content related to patient care or clinical experiences. This is a HIPPA violation.
- It is never appropriate to photograph and/or post a patient photo, patient record, or any other type of private or confidential information. This is a HIPPA violation.
- Recognize that “deleted” content may still be accessible.

Always Maintain Professionalism

- Students may not access any social networking sites during clinical, laboratory, or classroom time unless guided by faculty as a course requirement.
- You may not communicate with patients in any on-line platform, e.g., Facebook, Twitter.
- You may not “friend” a patient, patient’s family members or significant others.
- You may not post anything about a patient or a patient encounter.
- Avoid posting pictures of yourself participating in any unprofessional behaviors or activities, e.g., drinking alcohol, or dressing in a sexually provocative manner. Potential employers and the board of nursing may deem this a violation of moral turpitude regulations.
- Use the highest privacy settings, but recognize that there is no privacy on-line.
- Remember that professionals have both a legal and an ethical duty to protect a patient’s privacy.

Recording of class is prohibited without prior approval and will result in the student not being allowed back into class. This includes tape recording, video recording, mobile/cell phone recording, etc. Under no circumstance may any item be posted to an on-line service such as YouTube.

Consequences of Violation

Trocaire College nursing programs will not tolerate violations of the social networking policy. Disciplinary action may range from a written reprimand to dismissal from the programs to expulsion from the college.

It is important to remember that faculty, staff, and students are expected to behave with integrity. Integrity should, therefore, be reflected and upheld in all communications that are shared with the public or that may become public, whether or not the communication was originally intended for widespread distribution.
Faculty is here to assist students in acquiring academic and professional competence. Students must make the decision to learn and demonstrate motivation to succeed. In order to work together successfully, students and faculty need to have mutual expectations.

**Students Can Expect Faculty to:**

- Clarify course requirements and expectations no later than the first week of class. Most information can be found in the course syllabus.
- Provide contact information and information about their availability at the start of the course.
- Specify the expected time for response to student e-mails or phone calls.
- Specify the anticipated time for feedback on assignments.
- Provide information that will help students be successful in the course.
- Make course materials (e.g., lectures, access to a quiz, etc.) available by the week they are scheduled.
- Notify students of any guests who are invited into an online or web-enhanced course since their presence is not visible as in on campus courses.
- Not share anyone’s work with other students without permission; Faculty may share student work with Trocaire College administration, other faculty and/or accrediting bodies

**Faculty Expect Students to:**

- Become familiar with the syllabus and all course material and seek clarification as needed.
- Manage their time effectively to allow for active participation in the course throughout each week as defined in the syllabus.
- Communicate with the instructor when problems arise or when assistance is needed.
- Written Assignments:
  - All scholarly work (papers and assignment) should utilize scholarly writing style which requires that basic writing standards which includes: writing clear, concise, and grammatically correct sentences; using proper punctuation; demonstrating critical thought; and typed and using APA format.
  - Please use Owl at Perdu for general writing guidelines, citing (in-text, research, and references), formatting, and paper examples. Owl at Perdu offers APA tutorials; it is in a student’s best interest to master APA as it is mandatory in the social sciences and nursing). Owl at Perdu can be found online at: [https://owl.english.purdue.edu/owl/resource/560/01/](https://owl.english.purdue.edu/owl/resource/560/01/)
- Recognize that collaborative learning is a valued learning experience when handled constructively.
- Be aware of their own personal values and demonstrate respect for others, regardless of differing values and opinions.
- Maintain confidentiality and acknowledge patients’ privacy rights (HIPAA) in any communications about patient, co-workers, and/or employers.
- Practice good “Netiquette” throughout online courses or web-enhanced courses.
- Dress in a manner that will reflect high standards of personal self-image so that each student may share in promoting a positive learning environment within the college community
- Check their webmail (trocaire.edu) and Moodle daily.
- Activate and maintain Trocaire internet access account and delete old email regularly.

**Student-Faculty Appointments**
Students may make appointments to see faculty members during scheduled office hours or at other pre-arranged times. Office hours are posted on individual office doors. Instructors may be contacted by leaving a message on instructors’ voice mail or by email.

| CHANNELS OF COMMUNICATION & or Grievance or Grade Appeal |

Students have the opportunity to communicate their concerns about course or other issues in the nursing programs. Professional nurses are expected to follow the Chain of Command in resolving issues and conflict. Nursing school is a safe environment to learn and master this skill.

**Trocaire College Grade Appeal Policy**

The Grade Appeal Policy applies to questions of an instructor’s evaluation of student performance. The expectation is that the majority of appeals can be resolved through a flexible process of direct communication between student and instructor. A formal series of procedures has been established to ensure fairness to all parties in cases that cannot be resolved informally.

Please note that most problems can be resolved with a meeting with instructors. However, if students feel they have issues, the student should follow the appropriate chain of command as follows:

**Step I:** First speaking directly with the professor/clinical instructor. If a student has a concern or a problem with a professor, the student is expected to approach the involved professor and arrange an appointment to discuss the issue.

- Matters relating to the clinical area should be discussed with that particular clinical instructor.
- If the student feels there is unsatisfactory resolution, students should…..

**Step II:** Make an appointment and speak with their academic advisor.

- Each nursing student is assigned an advisor. The advisor is a nursing faculty member who assists an individual student in matters related to academic progress.
- If the student feels there is unsatisfactory resolution, they should…..

**Step III:** Make an appointment and speak with the Dean of the Nursing: by contacting Concetta Myers, Administrative Assistant Phone: 716-827-2452; myersc@trocaire.edu.

Again, any student who feels there is unsatisfactory resolution may make an appointment to meet with the Vice President of Academic Affairs, Dr. Allyson Lowe.

**Step IV:** Make an appointment with the Vice President of Academic Affairs, Dr. Allyson Lowe. You may contact Debra Steriovski, Administrative Assistant to Academic Affairs for an appointment SteriovskiD@Trocaire.edu.

**Preparing for meetings:** Please present your information in a clear, concise format of the problem, and steps taken to resolve the issue including: dates, time, and evidence from theory etc.

**Appeals Process**
Any student whose continuance in a program is rescinded because of failure to meet the course or clinical criteria may petition the College for reconsideration. The student will be granted a meeting with the Dean of Nursing program to discuss the student's specific circumstances in relation to program objectives and clinical affiliate policies. Clinical instructors will be consulted by the Dean of Nursing to discuss how, and if, the course and clinical objectives can be met.

**CODE OF PROFESSIONAL BEHAVIOR FOR NURSING STUDENTS**

1. **Substance Abuse** - A student who is found abusing any substance will be subject to review for possible dismissal from the Nursing programs per regulations as stated in the Student Handbook.

2. **Professional Attitudes and Behavior**
   The expectation of the Nursing Department is that students will conduct themselves in a professional manner at all times while representing the Trocaire College Catherine McAuley School of Nursing. Students are expected to be:
   - Honest and Ethical (express integrity)
   - Accountable - answerable for their own actions
   - Responsible - liable and conscientious
   - Dependable - trustworthy and reliable
   - Courteous - polite and respectful behavior and language
   - Punctual - arrives for class, laboratory, clinical and conferences at the specified time.

Students will be disciplined for unprofessional conduct, at the discretion of the Nursing Department, if at any time they behave in a manner which is inappropriate, unprofessional, disrespectful, argumentative, or endangers the health or safety of fellow students, faculty, staff, clients and/or a member of the health care team. This disciplinary action may also be implemented by the clinical agency for students that do not follow clinical agency policies during each clinical experience.

**Unprofessional conduct includes but is not limited to:**

- Verbal or nonverbal language, voice inflections, actions, or insubordination which compromise working relations with peers, faculty, staff clients, families/significant others or health care team members.
- Actions that may compromise contractual agreements between Trocaire and affiliate agencies
- Violation of legal or ethical standards
- Disruptive behavior of any kind that interferes with the clinical learning experience
- Using or being under the influence of any drug be it OTC, prescription and/or illegal, including alcohol that may alter judgment and/or interfere with safe performance or create a demeanor deficient in competence
- Breach of confidentiality in any form
  - (adapted from Borough of Manhattan Community College Nursing program)

3. **Professional Ethics** - The student will respect the policies of confidentiality related to patient information.

**Functional Abilities/Technical Standards for PN, RN and BS/N Programs in the Catherine McAuley School of Nursing**

In order to practice nursing, the student’s health must enable him/her to fulfill the requirements and outcomes of the nursing programs in the Catherine McAuley School of Nursing. The National Council of State Boards of Nursing recommends sixteen categories of functional abilities for nurses whom the Catherine McAuley School of Nursing follows for admission and progression in nursing programs. In
addition, all students must comply with the clinical agency’s performance policies, standards and requirements. Students unable to meet functional abilities/technical standards, with or without reasonable accommodation, will not be able to complete the program and will be counseled to pursue alternate careers.

The Catherine McAuley School of Nursing follows the College’s non-discrimination policy as outlined in the College Catalog. Students are encouraged to become familiar with this policy. Inquiries concerning this policy should be directed to: CivilRightsCompliance@trocaire.edu

A student with a disability is required to have the disability verified by the Student Counselor/Director of Wellness located in Room 118 of the Choate Street campus. Disability Services and the student will meet to identify which accommodations are reasonable. Students with documented disabilities may benefit from accommodations such as extended time on tests or note takers for example. (See college website for complete list of technical standards)

Students are advised that the College and clinical agencies associated with the Health Science Programs will rely upon the health information supplied by and for the student. Any student who withholds or knowingly submits incorrect health information shall be subject to disciplinary action (Student Handbook).

The College must provide student health information to clinical agencies as required by New York State Department of Health regulations and legal contracts with affiliating agencies.

**Technical Standards Policy.** *All students will sign an attestation of understanding for the program Technical Standards Policy.*

*Any student who is medically unstable, ill, or has an injury is required to have the Technical Standards Clearance signed by a qualified health care provider.*

1. Medical Clearance Attestation (to be completed by a qualified health care provider)

_____________ (student name) was seen in my office on ______________ (date). After reviewing the above Functional Abilities/Technical Standards for PN, RN and BS/N Programs in the Catherine McAuley School of Nursing at Trocaire College _______________ (print students name) may safely return to clinical and can perform all technical standards of the nursing program with no restrictions.

Please print name and sign:

Physician’s Name (Please Provide name, address, and office phone number):

Physician’s Signature: ____________________________

Date: ____________________________

**STUDENT EVALUATIONS OF COURSES AND INSTRUCTORS**

**Evaluation of nursing courses** - At the end of every semester, students will be asked to evaluate the nursing course they have completed. Evaluation provides an opportunity to offer constructive suggestions in an objective manner.

Student evaluations are reviewed by the Nursing faculty and Administration. Changes in the curriculum have resulted from student course evaluations.
Evaluation of instruction - During the course of the semester, students will also be asked to evaluate both classroom and clinical instructors. Students are asked to evaluate instructors in an objective manner, and they are encouraged to offer constructive suggestions. Students’ evaluations are used by faculty members for self-growth and improvement in their individual teaching responsibilities.

In addition to students, faculty members are evaluated by administrators and they also submit a self-evaluation. The total process of evaluation is to ultimately improve the total nursing program.

NURSING POLICIES FOR CONTINUANCE AND PROGRESSION

Progression Policy in the Nursing Programs

A student’s progression through the nursing program requires maintaining appropriate grades and the approval of nursing faculty that a student is qualified in all relevant aspects to practice nursing safely, ethically and competently. The nursing department reserves the right to review at any time the student’s ability to practice safely and competently and will do so automatically when the student:

- Receives a grade of C- or below in a nursing course
- Has earned a cumulative major GPA of below 2.0
- Is reported by a nursing faculty member or supervising nurse as having practiced unsafely, unprofessionally, unethically, or engaged in illegal behavior.
- Received a clinical failure. At the time of the clinical failure the “F” grade will be entered into CAMS and students will not be permitted to continue in the course.

Once admitted into the program, the following criteria must be met to satisfy progression requirements (enrolled/matriculated) before students are allowed to progress from one level to the next. These criteria are outlined below.

<table>
<thead>
<tr>
<th>Good academic standing</th>
<th>Students must demonstrate continued progress with their academic standing and make satisfactory progress toward the degree.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Failure to maintain good academic standing in the nursing program:</td>
<td></td>
</tr>
<tr>
<td>❖ <strong>Note:</strong> Refer to the College’s policies on Academic Dismissal (See College Catalog), which stipulate the conditions students must satisfy in order to continue as a matriculated student at the college. A student who is academically dismissed from the college may not remain in the Nursing program.</td>
<td></td>
</tr>
<tr>
<td>❖ <strong>Note:</strong> Students on an approved Leave of Absence will be considered to still be enrolled in the program unless the Leave of Absence has lapsed. <strong>Placement in the program, following a leave of absence, is based upon space availability.</strong></td>
<td></td>
</tr>
<tr>
<td>❖ Have not been suspended or dismissed from the college for any other reason, including but not limited to infractions of academic integrity policies or...</td>
<td></td>
</tr>
</tbody>
</table>
## GPA requirements

While not a condition of continuing enrollment per se, to satisfy graduation requirements for the nursing programs, a student must have a **Cumulative Grade Point Average of 2.0** after completing all required coursework in the program.

## Course Failure

A student who does not pass one of the **required nursing courses in the A.A.S. or PN programs** (including A&P II w/Lab, Microbiology w/Lab) but who remains enrolled in the program will need to repeat that course before they are allowed to continue taking additional nursing courses.

Any failure of a course that is a prerequisite to another course, including Liberal Arts courses, will need to be repeated in order to progress.

For example: Psy101 (General Psychology) is a prerequisite to NU122. If a failure occurs in Psy101, this course will need to be repeated before progression to NU122.

## Academic Dismissal From the A.A.S. or PN Nursing Programs

Students enrolled in the A.A.S. or PN Nursing programs will be academically dismissed from the program (but not necessarily from the college) for any of the following reasons:

- **Two or more course failures**, with course failure defined as receiving a grade of C-, D+, D, F, FX, or WF, in any of the following required courses:
  - Any nursing course required in the A.A.S. or PN program (courses beginning with the ‘NU’ or ‘PN’ designation)
  - Any of the science courses required in the A.A.S. program, including BIO 131 (Anatomy and Physiology II), BIO 131 L (A&P II lab), BIO 223 (Microbiology), and BIO 223 L (Microbiology lab).

**Examples:**
- failing the same NU or PN course twice
- failing two individual NU or PN courses
- failing an NU or PN course and a science (A&P or Micro)
- failing two science courses (A&P II & Microbiology)
- withdrawal from an NU or PN or science course twice will be considered 2 attempts at the course

### Failure/withdrawal explanation:

- A student w/draws from a course and then fails the same course = 2 failures.
- Any student who withdraws from a course and then passes this will not count as a failure in another course.
- Withdrawals are only counted when the student fails the same course.
- Withdrawals are counted as a failure when then withdraw twice from the same course = 2 failures.

**Examples:**
- failing the same NU course twice
- failing two individual NU courses
- failing a NU course and a science (A&P or Micro)
- failing two science courses (A&P II & Microbiology)
- withdrawal from an NU or science course twice will be considered 2 attempts at the course
<table>
<thead>
<tr>
<th><strong>Note:</strong></th>
<th></th>
<th><strong>Note:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>an attempt is any student enrolled in a course and withdraws for any reason.</td>
<td>Successful completion of a required course in the Nursing A.A.S. or PN program is defined as receiving a grade of ‘C’ or higher (i.e., A, A-, B+, B, B-, C+, or C) in that course.</td>
<td>an attempt is any student enrolled in</td>
</tr>
</tbody>
</table>

**Failure to successfully complete a required course in the nursing program**

**Course Repeat Policy**

The college’s policy on Course Repeats (See Repeat Course Policy, College Catalog) indicates that students may repeat a course only once unless they have signed authorization from the Program Director of the program in which they are enrolled. Under normal conditions, students will not be given permission to repeat a nursing or science course required in the Nursing program more than once. Further, students who repeat a science course more than once while enrolled in another program (for example, repeating BIO 130 (A&P I) more than once while enrolled in the General Studies program) will not be eligible to enroll or remain in the Nursing program.

- **Note:** A student may withdraw from a course in the weeks following the Add & Drop period and prior to the 10th week of the semester (See Course Withdrawal Policy, College Catalog). A withdrawal by itself carries no academic penalty (that is, a grade of ‘W’ does not affect the student’s Grade Point Average). However, a withdrawal does count as an attempt at the course and will be considered as part of the Repeat Course Policy. For example, a student who has withdrawn from a specific course during their first attempt at the course will normally be provided only one additional attempt to successfully complete that course.

**Note:** Students who fail a course but who believe that the failing grade is incorrect may file an academic grievance. Forms and information about this process can be obtained from the Academic Affairs office. Normally, students should first attempt to rectify the issue by directly contacting the faculty member teaching the course and only then can make an appointment with the Dean of Nursing. If the issue cannot be resolved, however, then the student is directed to begin the grievance process.

**III. Readmission to the A.A.S. or PN Nursing Program**

Students who have been academically dismissed from a Nursing Program may apply for readmission under the following conditions:

- A student enrolled in a nursing program who experienced a major or catastrophic personal event which can be shown to have had direct impact on their academic success and for which they had no control may apply for readmission. In reviewing the application for re-admission, significant consideration will be given to the following:
  - At the time of the major or catastrophic personal event, did the student contact their course instructor(s) and advisor in a timely fashion to inform them in writing of the issue? Did the student provide documentation or other credible evidence that a major or catastrophic event having impact on their academic performance has transpired?
If guidance was provided by the instructor(s) or advisor, did the student follow that guidance?

Has the personal issue been fully rectified such that it will no longer impact the student’s ability to be successful in the nursing program?

**Note:** Students who experience a major or catastrophic personal event but who do not inform their instructor(s) or advisor in writing in a timely fashion and/or who attempt to continue in the course or program (e.g., who take quizzes, exams, etc.) will **NOT** be eligible for readmission under this provision. It is the student’s responsibility to inform the faculty / program in a timely fashion when a significant issue arises that might impact their academic success.

**OR**

- A span of three years has passed since the student was academically dismissed from the nursing program at Trocaire.

All applications for re-admission must be submitted in writing to the Nursing Program Director using the form provided and will be considered on a first-come, first-serve basis. Depending upon course availability and clinical slots, students granted re-admission may not be able to enroll in courses in the semester immediately following the re-admission decision.

**OR**

Students who are unsuccessful in the AAS nursing program may apply to the PN program. Students must meet the PN admission requirements.

Once accepted into the PN program the following placement criteria will be used:

- Unsuccessful in 3rd semester nursing (NU 214) can apply for PN 106 and 107. If accepted, would complete the PN certificate program in one semester.

- Unsuccessful in 2nd semester nursing (NU 122) can apply for PN 105. If accepted, would complete the PN certificate program in two semesters.

- Unsuccessful in 1st semester nursing (NU 112) would need to apply for the entire two semester PN certificate program beginning with PN 104.

**Note:**

The college has a policy to provide former students an opportunity to return to Trocaire College for a different academic program without the burden of past academic difficulties (See **Academic Amnesty** policy, **College Catalog**).

Per the policy, students who are granted academic amnesty **must change their academic program** and must take a hiatus from the college for two full academic semesters (not counting summers). Therefore, students experiencing academic difficulty while enrolled in the A.A.S. Nursing program will not normally be able to use academic amnesty as a mechanism to return to the nursing program. Such students could use amnesty, however, as a mechanism to enter a different academic program.

Students will be notified by mail of the Nursing Readmission Committee’s decision.
§6900. Introduction. This article applies to the profession of nursing. The general provisions for all professions contained in article one hundred thirty of this title apply to this article.

§6901. Definitions. As used in section sixty-nine hundred two:

1. "Diagnosing" in the context of nursing practice means that identification of and discrimination between physical and psychosocial signs and symptoms essential to effective execution and management of the nursing regimen. Such diagnostic privilege is distinct from a medical diagnosis.  
2. "Treating" means selection and performance of those therapeutic measures essential to the effective execution and management of the nursing regimen, and execution of any prescribed medical regimen.  
3. "Human Responses" means those signs, symptoms and processes which denote the individual's interaction with an actual or potential health problem.

§6902. Definition of practice of nursing.  
1. The practice of the profession of nursing as a registered professional nurse is defined as diagnosing and treating human responses to actual or potential health problems through such services as case finding, health teaching, health counseling, and provision of care supportive to or restorative of life and well-being, and executing medical regimens prescribed by a licensed physician, dentist or other licensed health care provider legally authorized under this title and in accordance with the commissioner's regulations. A nursing regimen shall be consistent with and shall not vary any existing medical regimen.  
2. The practice of nursing as a licensed practical nurse is defined as performing tasks and responsibilities within the framework of case finding, health teaching, health counseling, and provision of supportive and restorative care under the direction of a registered professional nurse or licensed physician, dentist or other licensed health care provider legally authorized under this title and in accordance with the commissioner's regulations.  
3. The practice of registered professional nursing by a nurse practitioner, certified under section six thousand nine hundred ten of this article, may include the diagnosis of illness and physical conditions and the performance of therapeutic and corrective measures within a specialty area of practice, in collaboration with a licensed physician qualified to collaborate in the specialty involved, provided such services are performed in accordance with a written practice agreement and written practice protocols. The written practice agreement shall include explicit provisions for the resolution of any disagreement between the collaborating physician and the nurse practitioner regarding a matter of diagnosis or treatment that is within the scope of practice of both. To the extent the practice agreement does not so provide, and then the collaborating physician's diagnosis or treatment shall prevail.

Prescriptions for drugs, devices and immunizing agents may be issued by a nurse practitioner, under this subdivision and section six thousand nine hundred ten of this article, in accordance with the practice agreement and practice protocols. The nurse practitioner shall obtain a certificate from the department
upon successfully completing a program including an appropriate pharmacology component, or its equivalent, as established by the commissioner's regulations, prior to prescribing under this subdivision. The certificate issued under section six thousand nine hundred ten of this article shall state whether the nurse practitioner has successfully completed such a program or equivalent and is authorized to prescribe under this subdivision.

Each practice agreement shall provide for patient records review by the collaborating physician in a timely fashion but in no event less often than every three months. The names of the nurse practitioner and the collaborating physician shall be clearly posted in the practice setting of the nurse practitioner.

The practice protocol shall reflect current accepted medical and nursing practice. The protocols shall be filed with the department within ninety days of the commencement of the practice and may be updated periodically. The commissioner shall make regulations establishing the procedure for the review of protocols and the disposition of any issues arising from such review.

No physician shall enter into practice agreements with more than four nurse practitioners who are not located on the same physical premises as the collaborating physician.

Nothing in this subdivision shall be deemed to limit or diminish the practice of the profession of nursing as a registered professional nurse under this article or any other law, rule, regulation or certification, nor to deny any registered professional nurse the right to do any act or engage in any practice authorized by this article or any other law, rule, regulation or certification.

The provisions of this subdivision shall not apply to any activity authorized, pursuant to statute, rule or regulation, to be performed by a registered professional nurse in a hospital as defined in article twenty-eight of the public health law.

§6903. Practice of nursing and use of title "registered professional nurse" or "licensed practical nurse".

Only a person licensed or otherwise authorized under this article shall practice nursing and only a person licensed under section sixty-nine hundred four shall use the title "registered professional nurse" and only a person licensed under section sixty-nine hundred five of this article shall use the title "licensed practical nurse". No person shall use the title "nurse" or any other title or abbreviation that would represent to the public that the person is authorized to practice nursing unless the person is licensed or otherwise authorized under this article.

§6904. State board for nursing.

A state board for nursing shall be appointed by the board of regents on recommendation of the commissioner for the purpose of assisting the board of regents and the department on matters of professional licensing and professional conduct in accordance with section sixty-five hundred eight of this title. The board shall be composed of not less than fifteen members, eleven of whom shall be registered professional nurses and four of whom shall be licensed practical nurses all licensed and practicing in this state for at least five years. An executive secretary to the board shall be appointed by the board of regents on recommendation of the commissioner and shall be a registered professional nurse registered in this state.

§6905. Requirements for a license as a registered professional nurse.

To qualify for a license as a registered professional nurse, an applicant shall fulfill the following requirements:

Application: file an application with the department;

Education: have received an education, and a diploma or degree in professional nursing, in accordance with the commissioner's regulations;
Experience: meet no requirement as to experience; 
Examination: pass an examination satisfactory to the board and in accordance with the commissioner’s regulations; 
Age: be at least eighteen years of age; 
Citizenship: meet no requirement as to United States citizenship; 
Character: be of good moral character as determined by the department; and 
Fees: pay a fee of one hundred fifteen dollars to the department for admission to a department conducted examination and for an initial license, a fee of forty-five dollars for each reexamination, a fee of seventy dollars for an initial license for persons not requiring admission to a department conducted examination, and a fee of fifty dollars for each triennial registration period.

§6907. Limited permits.
A permit to practice as a registered professional nurse or a permit to practice as a licensed practical nurse may be issued by the department upon the filing of an application for a license as a registered professional nurse or as a licensed practical nurse and submission of such other information as the department may require to graduates of schools of nursing registered by the department, graduates of schools of nursing approved in another state, province, or country or applicants for a license in practical nursing whose preparation is determined by the department to be the equivalent of that required in this state.

Such limited permit shall expire one year from the date of issuance or upon notice to the applicant by the department that the application for license has been denied, or ten days after notification to the applicant of failure on the professional licensing examination, whichever shall first occur. Notwithstanding the foregoing provisions of this subdivision, if the applicant is waiting the result of a licensing examination at the time such limited permit expires, such permit shall continue to be valid until ten days after notification to the applicant of the results of such examination. A limited permit shall entitle the holder to practice nursing only under the supervision of a nurse currently registered in this state and with the endorsement of the employing agency.

Fees: The fee for each limited permit shall be thirty-five dollars.

Graduates of schools of nursing registered by the department may be employed to practice nursing under supervision of a professional nurse currently registered in this state and with the endorsement of the employing agency for ninety days immediately following graduation from a program in nursing and pending receipt of a limited permit for which an application has been filed as provided in this section.

NCLEX-RN Test Plan
To ensure public protection, each state requires candidates for licensure pass an examination that measures the competencies needed to perform safely and effectively as a newly licensed entry-level registered nurse.

Students can access the NCLEX-RN test plan 2013 by going to the following website; https://www.ncsbn.org/2013_NCLEX_RN_Test_Plan.pdf

AAS Nursing

Trocaire College has been educating compassionate, knowledgeable and devoted nurses to serve the greater Buffalo community for more than 50 years. Our nursing students are grounded in Mercy traditions and armed with real-world clinical experiences at hospitals and healthcare facilities all over Buffalo, where they learn how to apply their hands-on laboratory skills and complex classroom
fundamentals to situations they’ll face every day as they help heal Western New Yorkers. Nursing is a calling, and backed by their challenging, comprehensive and engaging Trocaire educations received in the Catherine McAuley School of Nursing, our students are empowered to answer that calling and find careers where they make a difference every single day.

Registered nurses are often on the front lines of direct patient care in hospitals and most other healthcare facilities. There’s more need than ever before for well-educated and highly trained RNs, and Trocaire’s curriculum prioritizes the knowledge and skills needed to promote, maintain and restore health within our diverse and ever-changing healthcare system. Our immersive clinical placements allow students to gain hands-on experience in various settings and identify a career path they’re passionate about.

Minimum Degree Requirements:

- A total of at least 67 semester hours with a GPA of 2.0
- General Education Requirements:*  
  - College Seminar (GS100) or College Success (GS102)  
  - Humanities (EN101, EN102)  
  - Natural Science (BIO130/130L, BIO131/131L, BIO223/223L)  
  - Philosophy (PH103, PH205)  
  - Social Science (PSY101, PSY102, SOC101)
- Program-Specific Requirements:*  
  - NU110, NU112, NU114, NU115, NU116, NU122, NU 124, NU214, NU217, NU220, NU222  
  - During their second years of study, students are required to take two major nursing courses each semester.  
  - *A minimum grade of “C” (2.0) is required in all courses. A “C-” grade is not acceptable.  
  - * Students must maintain a GPA of 2.0 in order to progress in the program.
Overview

The Baccalaureate Degree in Nursing (also referred to as the Bachelor of Science Degree with a major in Nursing or the BS in Nursing or the BS/n) was created to provide Registered Nurses with strong leadership skills in collaborating with clients, other professional groups, and the community for the purpose of promoting, maintaining and restoring health. The Program extends beyond the clinical aspects of nursing to provide a background in patient education, health promotion, community health, health care across the lifespan, and technology integration. Graduates of this program will base their practice on theories, critical thinking, and research findings from nursing science as well as other disciplines. Courses, all of which are offered as distance education in the hybrid or blended format, are designed specifically for the registered nurse, drawing from, and expanding upon real-life professional nursing experiences. The Baccalaureate Degree in Nursing can be completed in as few as 16 months of full-time study.

Distance learning conducted at Trocaire College is in compliance with the “Benchmarks for Success in Internet-based Distance Learning” as presented by the Institute for Higher Education Policy and in accordance with the Middle States Commission on Higher Education “Interregional Guidelines for Electronically Offered Degree and Certificate Programs”, in accordance with the guidelines published by the New York State Department of Education’s Office of College and University Evaluation, and with the Americans with Disabilities Act.

All faculty members who teach distance education courses are required to be certified to teach courses online by completing the Indiana University Certificate in Distance Learning or the Quality Matters (QM) Certificate Program.

General information

The Trocaire College Nursing Student Policy Handbook and guide is the resource for understanding the academic and administrative policies that are important for academic success. It includes a wide range of information for important federal policies, including rights to privacy, grading policies, and policies and procedures concerning refunds, withdrawals and other administrative issues. Policies and procedures that apply specifically to the bachelor’s degree in nursing are listed on the following pages.

The BSN curriculum moves from simple to complex and from the individual to the community. Each nursing course builds on the knowledge of the previous level courses. Courses in each level of the curriculum must be completed before advancing to the next level. Any variations must be approved by the Dean of Nursing. Students attending classes on a part-time basis should plan on taking 1 nursing course and 1 liberal arts course.

Application Procedures

In order to be considered for admission you must submit:
1. A complete application for admission to Trocaire College
2. Official transcripts from all colleges and universities you have attended.
3. One letter of recommendation from a person with whom you interact professionally
Admission Guidelines

1. Applicants must hold an Associate’s Degree in Nursing from an accredited institution. Applicants, who have graduated from a program that is not accredited, but which is approved and registered with the New York State Education Department, are also eligible for admission.

2. Applicants must have earned a minimum cumulative grade point average (GPA) of 2.50 in their prior nursing program, and must have earned a minimum grade of "C" in all nursing courses. Applicants who have a GPA below 2.5 may be considered for the Baccalaureate in Nursing Program if they have extensive clinical experience or extenuating circumstances.

3. Students who have graduated from an Associate’s Degree in Nursing Program but have not obtained their nursing license may be admitted to the program and allowed to take any or all courses offered in the first semester of study only. Students may not progress to the second semester of study without an RN license which must be submitted to the Dean of Nursing to be given to the Registrar. Experience practicing as an RN immediately preceding matriculation is not required, but is recommended.

4. The Baccalaureate in Nursing Program requires a total of 123 academic credits for completion. Sixty-three of these credits must be in nursing and the remainder in the liberal arts/general education courses. Candidates may transfer up to a total of 33 nursing credits. Exceptions may be granted to students transferring from a Baccalaureate Degree in Nursing Program. Liberal arts credits have no limit for transfer and are based on individual transcripts. Graduates of diploma nursing programs will be granted thirty three transfer credits in nursing and must complete the Liberal Arts requirement.

5. All students must meet the health requirements of the college and collaborative health care agencies. Satisfactory health clearance - Tuberculosis test (PPD), Measles Mumps and Rubella certificate of immunity (MMR), Diphtheria, Pertussis and Tetanus certificate of immunity (DPT), and a copy of current CPR registration must be filed with the college’s Health Office at the time of registration and prior to clinical facility experiences.

Waiver of Trocaire College Nursing Bachelor’s Courses

Credits from previously completed bachelor level nursing course may be submitted for the purpose of transfer. Nursing courses from hospital diploma programs both in the United States and abroad are not eligible for transfer credit. Bachelor’s course work credit submitted for as a request for waiver must:

- Be from a regionally accredited degree-granting institution of higher education
- Have been completed no more than five years from the date of enrollment in the Trocaire College bachelor’s nursing program.
- Cover content equivalent to that of the course for which the waiver is sought.
- Carry a grade of C or better

General Education Component

There is no time limit on general education courses submitted for transfer credit. Credits earned at accredited degree-granting institutions or through approved examination programs, and for which official transcripts are available, will be considered for transfer regardless of when they were completed. Although grades of D are acceptable in the general education component students must have the necessary grades to achieve a C average.

Nursing Component

Credit being submitted from bachelor’s-level nursing courses for the purpose of meeting the requirements of the nursing degree must have been earned within five (5) years from the date of enrollment in the program. There is no time limit on the acceptance of nursing credits as long as students remain actively involved in the Trocaire College nursing program.
Students who have completed an Associate’s Degree nursing program, but have not obtained their RN license may be admitted to the program but will only be allowed to take courses offered in the first semester of study. *Student may not progress to the second semester without submitting their RN license.*

**Curriculum**

The BS with a Major in Nursing program required a total of 123 academic credits for completion. Sixty-three of these credits must be in Nursing courses and the remainder in Liberal Arts or General Education courses. Candidates may transfer up to a total of 33 Nursing credits. Exceptions may be granted to students transferring from a Baccalaureate Degree program in Nursing. Liberal arts credits have no limit for transfer and are based on individual transcripts. Graduates of a diploma Nursing program will be granted 33 transfer credits in Nursing and must complete the Liberal Arts requirements.

A student must obtain a minimum grade of C in all courses required in the program. Failure to successfully complete course work that is required by the program results in dismissal from the program. A student may repeat a nursing course only once.

**Class Schedule**

The Baccalaureate degree may begin in the fall, spring, or summer. Courses are offered in both a distance education and an in-classroom format. The face-to-face BS in nursing courses meet at the Main Trocaire College campus, while some of the liberal arts courses may take place at the Transit Road location. The health assessment component of courses occurs in the simulation lab at the Main Trocaire College campus.

**Clinical Experiences**

The NU 486 Capstone course includes a total 135 clinical practice hours. The table below provides a detailed description of the clinical practice experiences which will be provided to the Baccalaureate Nursing students:

<table>
<thead>
<tr>
<th>Clinical Sites</th>
<th>Clinical Practice Hours</th>

**Minimum Academic Average**

A minimum grade of C (2.0) in any required nursing course or S (Satisfactory) by the second attempt. Grades of D are not acceptable in transfer. Grades of D and F in any Trocaire College course are included on the official transcript. These grades will be calculated in the GPA. A cumulative average of C (2.0) or better is required to graduate. Although grades of D are acceptable in the general education component students must have the necessary grades to achieve a C average.

**Policy on Repeating Nursing Courses**

A student must achieve a 2.00 QUALITY POINTS or better to progress to the next level. Students must achieve a grade of “C” or better in all program required courses. Students may repeat a course in instances where they have received grades of C-, D+, D, F, FX, W, WF, and U. Failure on the second attempt will lead to dismissal from the program. A grade of W counts as an attempt at taking the course.

**BS in Nursing Program**

**Human Flourishing**
Incorporate the knowledge and skills learned in didactic and clinical courses to help patients, families, and communities continually progress toward fulfillment of human capabilities.

**Nursing Judgment**
Make judgments in practice substantiated with evidence that synthesize nursing science and knowledge from other disciplines in the provision of safe, quality care and promote the health of patients, families, and communities.

**Professional Identify**
Express one’s identity as a nurse through actions that reflect integrity; a commitment to evidence based
practice, caring, advocacy, and safe, quality care for diverse patients, families, and communities; and a willingness to provide leadership in improving care.

**Spirit of Inquiry**
Act as an evolving scholar who contributes to the development of the science of nursing practice by identifying question in need of study, critiquing published research, and using available evidence as a foundation to propose creative, innovative, or evidence based solutions to clinical practice problems.
The Practical Nursing program curriculum incorporates established professional standards, guidelines, and competencies, and has clearly articulated student learning and program outcomes.

The Practical Nursing program was created to provide students with educational opportunities that lead to licensure and job placement. Licensed Practical Nurses (known as LPN’s) scope of practice requires that they work under the direction of registered nurses and doctors, providing care for clients who are ill, injured, or facing long-term recovery.

Section 6902 of Article 139 of NYS Education Law distinguishes the legal definitions of an LPN practicing in NYS as follows: *The practice of nursing as a licensed practical nurse is defined as performing tasks and responsibilities within the framework of case finding, health teaching, health counseling, and provision of supportive and restorative care under the direction of a registered professional nurse or licensed physician, dentist or other licensed health care provider legally authorized under this title and in accordance with the commissioner's regulations.*

The program curriculum has been approved by NYSED and meets educational requirements for individuals desiring to obtain NYS licensure as a LPN. The current curriculum and sequence for the Practical Nursing program is provided here in Table 4.1 (See Table 4.1) and is also found in the College Catalog (page 77).

**Practice Standards**

Sequencing and content for the Practical Nursing program curriculum builds upon the nursing competencies and professional nursing standards. In addition, program follows the scope of practice of a practical nurse. The program integrates nursing Code of Ethics and Scope of Professional Standards of Practice of a practical nurse. The program also teaches students about the definition and scope of practice for Licensed Practical Nurses as provided by the NYSED Office of Professions, Regulation §6902.

Students are expected to demonstrate professional behavior, compassion and kindness, teamwork, and ability to manage difficult issues. The student learning outcomes (SLOs) demonstrate competencies that are leveled throughout the program. The SLO’s and expected competences are developed using well-recognized standards.

Beginning fall 2017 the program has integrated the NAPNES standards within the curriculum. NAPES standards were chosen because these standards focus on the role of the practical nurse. According to NAPNES: These standards and competencies are intended to better define the range of capabilities, responsibilities, rights and relationship to other health care providers for scope and content of practical/vocational nursing education programs. The guidelines will assist:

- Faculty in the development, implementation, and evaluation of practical, vocational nursing curricula.
- Students in understanding expectations of their competencies upon completion of the educational program.
- Prospective employers in appropriate utilization of the practical/vocational nurse
The curriculum is designed so each course builds on previous courses within the program sequence. The program is based on an open systems framework which emphasizes caring, communication, the nursing process and the bio-psycho-social dimensions of human beings.

Curricular concepts that are woven through the program are integral to the role of a practical nurse. These concepts are linked to the Practical Nursing program philosophy, conceptual framework, national nursing and practical nursing standards and guidelines. Alignment of national nursing standards and patient safety standards in the curriculum includes concepts such as:

- Care of the client (behaviors, values, and beliefs)
- Safe and effective care of the client
- Culture competence
- Clinical reasoning, and judgement
- Care of clients that demonstrate respect and dignity
- Patient-centered nursing care
- Ethical-legal concepts
- Evidence based nursing care
- Professional responsibility
- Team work and inter-professional collaboration

**PN106 STUDENTS**

**CHILD ABUSE RECOGNITION AND REPORTING COURSE**

Child Abuse Recognition and Reporting Course are mandated by the State Education Department of the State of New York. Students who are absent for this PN106 classroom theory must contact the course instructor to make arrangements to attend another class presentation or show documentation of attendance at a child abuse seminar. This is a requirement for license application and registration in New York State.

**Skills Labs and Simulations:** Nursing labs utilized in the Practical Nursing program consist of skills acquisition and health assessment appropriate to the credential. Acquiring psychomotor skills is a component included in the education program of nursing courses. These skills include activities from simple to those of the highest complexity, which involve high-precision, coordinated movements. Simulation, which supports but does not replace clinical experience, enables students to practice a medical scenario in order to problem solve in real time and determine the most effective solution.

**General Education Courses**

Practical Nursing students are required to take five general education courses and one college success course as part of their curriculum. The general education courses include Anatomy and Physiology (I and II) and their associated labs, English Composition, General Psychology, and Principles of Sociology. All entering Trocaire students must also take the one credit College Seminar or, if they have been assigned to the Transitional Studies program as a result of their performance on entering placement tests, the three credit College Success course.

The Anatomy & Physiology courses provide an essential foundation of the human body that includes functions of cells, tissues, and the integumentary, skeletal, muscular, and nervous systems. Additionally, these courses introduce students to common human disease processes which students can build upon throughout the nursing program.
English courses provide students with basic elements of writing and essential communication skills. Psychology and Sociology courses provide a framework of human development and behavior, as well as information on human behavior and the human condition. Students build on this framework to provide holistic care to clients.

These general education program requirements lead to licensed practical nurses who are well-rounded and who are able to function well in the demanding healthcare environment, which depends upon teamwork and critical thinking skills.

TROCAIRE COLLEGE
Catherine McAuley School of Nursing
Nursing Student Handbook Attestation
Fall 2019

I,__________________________________________, have received a copy of the Trocaire College Catherine McAuley School of Nursing Policy and Procedure Manual. Please review this edition carefully, then sign the statement below and return it to your course instructor NO LATER THAN Friday September 6, 2019. This form must be completed and on file in order for students to attend clinical.

This Manual prescribes standards of conduct for students enrolled in the Trocaire College Nursing Programs. The standards are in addition to those prescribed for students under Trocaire College policies and administrative regulations. Violation of any such standard may serve as grounds for program dismissal, suspension, or other discipline.

Every student is expected to know and comply with all current policies, rules, and regulations as printed in the college catalog, student handbooks, & the Catherine McAuley School of Nursing Policy and Procedure Manual.

Your signature indicates that you accessed a copy of the Catherine McAuley School of Nursing Policy and Procedure Manual (found on the Trocaire Home Page under the Nursing Program tab) and that you have read and understand the information found in the Catherine McAuley School of Nursing Policy and Procedure Manual. Your signature also indicates that you understand that information about general college policies is in the college General Catalog & Student Handbook, and that information specific to each course can be found in the course syllabus.

I further understand that failure to read the Catherine McAuley School of Nursing Policy and Procedure Manual and college handbook does not absolve me from the college and/or the nursing program policies and or requirements.

I have read and I understand that the Functional Abilities/Technical Standards for PN, RN and BS/N Programs in the Catherine McAuley School of Nursing at Trocaire College and accept the responsibility for adhering to the technical standards. I further understand that any changes in my ability to perform the above duties require notification of the nursing program and a medical release from your health care provider.
