

**End-of-Program Student Learning Outcomes
B.S. in Nursing Program**

Director: Dr. Ann-Marie John

Date Updated: March 9, 2020

EPSLO Number / Title	Learning Outcome Statement
1: Communication	At the end of the program, the student will communicate and collaborate in a timely manner with members of the interdisciplinary health care team to promote and maintain the optimal health status of patients, families, populations, and communities.
2: Collaboration	At the end of the program, the student will communicate and collaborate in a timely manner with members of the interdisciplinary health care team to promote and maintain the optimal health status of patients, families, populations and communities.
3: Critical Thinking	At the end of the program, the student will use clinical reasoning and knowledge based on the baccalaureate degree nursing program of study, evidence-based practice outcomes, and research studies as the basis for decision-making and comprehensive patient care.
4: Safety	At the end of the program, the student will provide safe, compassionate, comprehensive nursing care to patients, families, populations and communities through a broad array of health care services.
5: Informatics	At the end of the program, the student will appropriately apply emerging patient care technologies and utilize sophisticated information management systems in the healthcare setting.
6: Professional Standards	At the end of the program, the student will analyze and implement appropriate nursing practices in accordance with the complex interrelated requirements of the healthcare policy, finance and regulator environments.
7: Professional Responsibility	At the end of the program, the student will demonstrate knowledge of the New York State Nursing Practice Act and the New York State Office of Professions Nursing Rules that emphasize safety, as well as all federal, state, and local government and accreditation organization safety requirements and standards.
8: Safety/Technology	At the end of the program, the student will communicate and manage information using technology to support decision-making to improve patient care and delivery systems.
9: Advocacy	At the end of the program, the student will serve as a health care advocate in monitoring and promoting quality and access to health care for patients, families, populations, and communities.
10: Leadership/Management	At the end of the program, the student will demonstrate skills in leadership, quality assessment and improvement, and patient safety.
11: Research	At the end of the program, the student will maintain a spirit of inquiry and use research findings to provide evidence-based nursing care.
